

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Link's Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

IS Business Analyst - Environment, Health and Safety ManagementReference Code: 59444

Department: Information Services Location: Canada (CA) - Calgary, AB Job Category: Information Technology/SystemsEmployment Type: Employee

Full-timeRelocation Eligibility: This position is not eligible for our relocation programApplication Deadline: 11/27/2019 We all need energy. It warms our homes, cooks our food, gives us light, and gets us where we need to go. It also improves our quality of life in countless other ways. At TC Energy, our job is to deliver that energy to millions of people who depend on it across North America. And we take our job very seriously.Guided by our values of safety, integrity, responsibility and collaboration, we develop and operate our facilities safely, reliably and with care for our impact on the environment. With our presence across the continent, our people play an active role in building strong communities.We're proud of how our hard work and commitment sets us apart and benefits society, every day. We're looking for new team members who share our values and are ready to take on exciting challenges.The opportunityOur Enterprise IT Services (EITS) Canada team is evolving to meet the needs of our growing business and we are expanding our presence in Calgary, Alberta to support our Information Services department.We are seeking a self-motivated and ambitious Business Analyst who has knowledge and experience in analyzing and developing business requirements and process designs to assist in enabling clients to achieve business strategies more effectively. This individual has the proven skills, competencies and capacity to coordinate several operational projects and initiatives at the same time while working with internal and external stakeholders directly. You will be partnering with and supporting our Strategic Business Analysts to build out future state business capability roadmaps that identify opportunities to maximize the generation of value in growing and transforming business capabilities for the Environment, Health and Safety department at TC Energy.What you'll do

- Work closely with Health, Safety & Emergency Management business partners (Safety, Health & Industrial Hygiene, Emergency Management, and Safety Excellence) to determine business requirements and collaborate to identify appropriate solutions to meet the business need
- Prepare and maintain relevant documentation (e.g. requirements documents, functional specifications, training materials)
- Execute operational enhancements and contribute to projects
- Provide progress feedback on enhancements and projects
- Perform and coordinate unit, integration and acceptance tests
- Collaborate with the Development Team members in the design and testing of interfaces, enhancements, reports and data conversions in the Development & Quality Assurance systems and implement them in Production
- Deliver application configuration and product knowledge to help support business and project objectives
- Engage with development teams, security, reporting, master data, projects and change management teams
- Where required, provide tier 3 level support and guidance for SAP and related applications
- Coordinate incidents to resolution through the ServiceNow application
- Other tasks as required

Minimum Qualifications

- Bachelor's Degree in Business, Computer Science or related discipline is required
- Minimum of 4 years of relevant work experience is required within the area of Environment, Health and Safety Management
- Intermediate experience and proficiency with various business software applications (SAP, Microsoft Excel, SharePoint, MS Office Suite, Visio, Power BI)
- Experience in gathering business requirements and in business process mapping
- Strong process and systems thinker who understands interdependencies and can design and refine solutions with these in mind with demonstrated success in problem identification and resolution
- Demonstrated ability to identify the current state situation, design the future state, and manage any gaps in solution delivery
- Ability to thrive in a fast paced, growth-orientated environment where change occurs continuously
- Effective relationship building with team members, business partners, external vendors, and key stakeholders
- Excellent time management skills to balance competing priorities
- Motivated problem solver who is able to work efficiently and effectively under minimal supervision
- Ability to effectively communicate to all levels of personnel; from field/operations through to Corporate management

Preferred Qualifications

- Functional experience in supporting and configuring SAP EHSM module is preferred
- Knowledge of integration to other SAP functional modules (QM and PM) is preferred
- Energy industry SAP implementation is preferred
- Understanding and working knowledge of database relationships and the set-up Client/Server applications is considered a strong asset
- Certification in Lean Six Sigma is considered an asset
- Experience and demonstrated acumen with a keen interest for the energy industry and TC Energy's operations
- Detail-oriented with strong organization and prioritization skills

- Strong conflict management and issue resolution skills
- Demonstrates a positive and professional attitude
