

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Ministry of Health

This is a temporary opportunity until May 31, 2025. This temporary opportunity may be extended and/or become permanent.

Remote work is allowed; this position can work up to full time from their home in British Columbia subject to an approved telework agreement. The locations listed in the online posting are to assist applicants in searching for this opportunity and are not a complete list of locations.

Data Analyst

\$69,760.70 - \$79,322.69 annually

The Provincial Health Officer (PHO) is the senior public health official for British Columbia (BC) and is responsible for monitoring the health of the population of BC and providing independent advice to the ministers and public officials on public health issues.

The Population Health Surveillance and Epidemiology (PHSE) team is responsible for applying advanced statistical and epidemiological methods to monitor the trends in population health and health inequalities in the province. The data analyst will support the PHSE in the development of advanced statistical methods for public health surveillance and applied epidemiological research.

Qualifications for this role include:

- Bachelor's degree or higher in data science, computer science, statistics, mathematics, health information science, public health, health studies, or other physical, life or social sciences or in a related field and a minimum of 1 year of *related experience; OR
- Diploma in data science, computer science, statistics, mathematics, health information science, public health, health studies, or other physical, life or social sciences in the related field and a minimum of 2 years of *related experience; OR
- Certification in data science, computer science, statistics, mathematics, health information science, public health, health studies, or other physical, life or social sciences in in the related field and a minimum of 3 years of *related experience; OR
- Any equivalent combination of education and *related experience.

*Related experience must include the following:

- Working experience in statistics, computer sciences, mathematics, data sciences, public health or other related disciplines
- Recent direct experience conducting quantitative analysis with multiple datasets using R or Python
