

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Req Id:234694The Source is Canada's largest tech retailer, and every day we come into work excited to share cool tech and amazing brands with our fellow Canadians. From your local shopping centre to cool music festivals, we are where Canadians live, work and play. Every day our Associates across the country help Canadians find the tech they want and need. The Source is a great place to work and we are committed to your development through best in class training programs that help you do your best. Behind our in-store Associates is a supporting team of professionals who curate our product assortment, ensure on-time deliveries, create engaging marketing campaigns and help keep our systems running at peak capacity. We are passionate about what we do and look for individuals with their own passion, curiosity and genuine helpfulness to join us. The career you want. As Business Analyst you will lead at the working level the delivery of commerce/digital IT solutions on behalf of and in conjunction with the Source business. The primary deliverables include the elicitation of business, system, functional and non-functional requirements and participating in the successful development and deployment. The incumbent will work for and alongside an IT Team Leader or Project Manager, and will partner with other IT teams as well as external vendors. Success requires a highly motivated individual who thrives in a constantly changing and exciting environment, applying creativity and innovation in the development of solutions essential to support The Source's current and future success. The focus for this role is providing commerce and digital store and operations related processes.

- Eliciting/gathering and documenting business requirements, developing business knowledge and providing domain consulting and ensuring compliance via a Traceability Matrix.
- Translating (or working with IA / UX teams to translate) business requirements into system requirements and collaborate with Design, QA and Development team members to ensure that requirements are understood and met during future project phases. Review design/interface specifications for completeness.
- Test the system as appropriate/required and track the testing of others (or interface with a test manager) where required to ensure a quality product is delivered.
- Prepare or assist in the preparation of deployment documentation, business deployment plans to ensure continuity.
- Participate in deployment and post deployment activities to ensure the system is running as it

should.

- Assist in developing and updating other project deliverables such as charter, plans, feasibility analysis, etc.
- Research and identify industry best practices related to business needs.
- Help resolve issues, risks and dependencies within the track and across different tracks.

 Skills we’re looking for.

- 3 year college or university degree or equivalent
- Proficient in MS Office, MS Project and Visio
- Process Modelling experience
- Experience with Responsive Design
- Excellent verbal and written communication and negotiation skills
- Experience leading multi-disciplinary JAD sessions
- Significant experience dealing with multiple vendors in the creation of multi-tiered end-to-end solutions.
