

# Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

### Description

Req Id:238645;At Bell, we do more than build world-class networks, develop innovative services and create original multiplatform media content & we're revolutionizing how Canadians communicate.

If you're ready to bring game-changing ideas to life and join a community that values bold ideas, professional growth and employee wellness, we want you on the Bell team. Bell is making unmatched investments in our world-leading broadband fibre and wireless networks because we know they're the backbone of the products and services our customers love. If you're excited about transforming the way people connect, our Network team is the right place for you.

The Bell Network Security Engineering and Program Management team is looking for new people to lead the evolution of security practice in Bell. As a Security program lead, you must understand the management and security environments of Bell Canada (internal clients) and those of managed clients (external clients) in terms of the various Bell's cybersecurity objectives. Your main role will be to lead the SOC enablers/features program with major deliverables like automation prioritization and security controls roadmap. You'll be involved in technical, financial and strategic discussions and decisions involving multiple stakeholders. An agile and incremental approach is essential to deliver flawlessly the security environment. Candidates must be self motivated, open minded and a passion for creativity. The successful candidate will partner closely with other program managers and delivery stream leads of various business units (i.e. IT, Network, BBM, etc) in order gain and maintain alignment. Your responsibilities:

- Lead, track and influence the SOC enablers/features program (automation prioritization and security controls roadmap) from a planning, delivery and financial perspective
- Support financial plan and annual budget of the security program (forecasting, tracking, analysis, reporting)
- Support and encourage agile delivery approach and scrum methodology in the team, which includes leading planning, Kanban boards grooming and prioritization, retrospective sessions
- Understand and track overall security posture by generating metrics and leading various related projects
- Participate in the continuous improvement of security standards

- Supervise the development and implementation of new technological approaches, services and methods and analyze the resulting impact on security posture

Essential skills:

- University degree in engineering, business administration, information technology or related disciplines
- 3+ years experience in strategic planning
- 3+ years experience in project/program management of Security, Network or IT technology solutions
- Excellent verbal, written, and interpersonal communications skills
- Autonomous, self-learner and ability to assimilate new methodologies, frameworks and technologies
- High tolerance to ambiguity and ability to adapt in a fast-evolving environment
- Strong leadership abilities and business acumen
- Strong dedication to customer focus
- Ability to manage time and priorities across multiple projects and duties
- Excellent synthesis and analysis capacity
- Excellent knowledge of MS Office

#LI-SAH1 &#160;Bilingualism is an asset (English and French); adequate knowledge of French is required for positions in Quebec.&#160;&#160;Additional Information:Position Type:

Management&#160;

Job Status:&#160;Regular - Full Time&#160;

Job Location: Canada : Quebec : Montreal&#160;

Application Deadline: 09/23/2019&#160;&#160;Please apply directly online to be considered for this role.&#160; Applications through email will not be accepted.&#160;At Bell, we don&#8217;t just accept difference - we celebrate it. We&#8217;re committed to fostering an inclusive, equitable, and accessible workplace where every team member feels valued, respected, and supported, and has the opportunity to reach their full potential. We welcome and encourage applications from people with disabilities.&#160;Accommodations are available on request for candidates taking part in all aspects of the selection process.
