

# Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

### Description

Provide research support for faculty members in their teaching, research and laboratory activities. Work is performed independently, with the availability of direction and guidance from Research Staff or Manager. Accountabilities

1. Adhering to established research methodology, gather and compile data for the research study or project.
2. Modify and adapt research methods, techniques or procedures, based on deviations in experimental results.
3. Record, classify, and summarize research data according to established procedures.
4. Conduct structured participant interviews and focus groups.
5. Carry out intermediate level statistical analyses.
6. Contribute to the preparation of data for reports, journal articles, papers, etc.
7. Conduct literature reviews and synthesize findings.
8. Perform other related tasks as outlined by the researcher.

Interviewing skills experience and proficiency in excel is a definite asset. The McMaster Education Research, Innovation and Theory (MERIT) program has served the Faculty of Health Sciences, McMaster University for more than 45 years. We collaborate with faculty to engage in high-impact, high-value education scholarship. Formerly known as the Program for Research and Development (PERD) we have six scientists and several research support staff. Our vision is to grow a community of scientists and clinicians to advance health professions education through research and applied science. The successful candidate will support several Senior Scientists in their responsibilities and activities related to MERIT.
