

# Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

### Description

LOCATION: Calgary, Alberta (CA-AB)

JOB NUMBER: 27693

&#160;Why you should join us:Do you want to be a part of the execution and building of Suncor&#8217;s safety and productivity technology (SPT) organization and lead the implementation of new technology on Suncor&#8217;s construction projectsWe want to talk to you.This role will perform the front-end planning of the technology implementation on projects, progressing to site execution and operations with an estimated focus to encompass 60% project management, 20% construction, 20% technology.You will use your expertise to:

- Lead the full integration of the SPT scope into the integrated project team including all project management activities
- Responsible for managing stakeholders associated with the technology implementations
- Interface with project teams, including digital and enterprise technical to develop scoping and planning activities, source technology and ensure successful implementation
- Support overall project performance though the use of actual workforce data
- Facilitate project execution phase including set up of&#160; site based processes and infrastructure to achieve the technology go-live milestone
- Develop and roll out of the SPT framework and execution plans
- Define the critical metrics and requirements for a construction safety technology with a \"man-down\" location device to measure program success
- Support the development of SPT standards, guidelines and processes to implement and execute the SPT in accordance with to asset development and execution model (ADEM)
- Support development and improvement opportunities

We&#8217;d like to review your application if you have&#8230;Must-haves (minimum requirements):

- Minimum five years of experience in oil and gas industry
- Four or more years of experience in project management, information management, technology and/or construction
- Post-secondary degree, preferably in engineering or technology systems
- Proficiency in Microsoft Office (Word, Excel, Visio, PowerPoint, Project, SharePoint) and SAP
- Leadership skills are critical with ability to self-execute scope to meet timelines

- Alignment with our values of: safety above all else, respect, raise the bar, commitments matter and do the right thing

Preference for:

- Experience leading projects and a team of individual contributors
- Previous experience with safety or productivity technology applications in construction
- Knowledge of oil and gas plants, equipment and facilities and site construction practices
- Knowledge of Power BI and Primavera P6
- Experience in workface planning
- Strong business insight with ability to form relationships and work collaboratively with diverse stakeholders, manage conflict and facilitate decision making processes to optimize outcomes
- Strong interpersonal skills including active listening, communicating and conflict resolution
- Adaptive work style with an ability to handle multiple priorities, challenging demands and function positively in a dynamic work environment

Where you'll be working, your work schedule, and other meaningful information:

- You will work out of our Calgary head office, located in the Suncor Energy Centre at 150 6th Ave S.W.
- Hours of work are a regular 40-hour work week, Monday to Friday
- This position requires short term (4 to 5 months) site placement on a fly-in, fly-out rotation (4 days on, 3 days off)
- Must possess valid driver's license and a clean driving record

Why SuncorWe are Canada's leading integrated energy company with a business portfolio that includes oil sands development and upgrading, offshore oil and gas production, petroleum refining, and product marketing under the Petro-Canada brand. Our global presence offers rewarding opportunities for you to learn, contribute, and grow in a variety of career-building positions. We live by the value of safety above all else; do it safely, or don't do it. Our strong track record of growth and a focus on sustainability mean tremendous potential for the future. Learn about our mission, vision and values. In addition to rewarding job opportunities, we offer an attractive employee package, including:

- Competitive base salary, compensation programs, and an annual incentive program
- Flexible benefits package
- Rewarding pension and savings plans
