

# Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

### Description

LOCATION: Calgary, Alberta (CA-AB)

**JOB NUMBER: 29205** Why you should join us: In this position, reporting to the Solution Delivery Director within Digital Project Execution, you will lead a team of cross-disciplinary resources to ensure solutions are executed with high quality throughout the delivery lifecycle (requirement gathering, business and solution designs, code development, testing cycles, and the end product). You will bring strong communication skills, dynamic and critical thinking, and influential capabilities to propose solutions that challenge and expand other's way of thinking. We will transform our delivery team mindset to embed quality in all solution activities. You will use your expertise to: Be accountable for the end to end quality of the solution delivery that addresses application and infrastructure technical requirements to meet business outcomes Define quality standards, guidelines, measurements, and targets for work products for the entire project life cycle (development, analysis, design, build, test, deployment, transition to operation) Provide effective leadership, direction, influence, motivation and support to a high-performing team of Quality Analysts, Contractors, and Vendor resources; plan and manage resource forecast based on demands and capacity, ensuring that the team is set up for success Lead the team to supporting multiple priority projects with agile and traditional methodologies while providing quality solutions that are scaled appropriately, are efficient, and meet all budget and quality target requirements Steward resources toward digital investment with an attitude to drive efficiency through automation and optimized approach while reducing costs and adding business value Define strategy and approach for automated testing for projects in various test cycles (Unit, Performance, Integrated, Systems, User Acceptance, Load) Model flexibility and adaptability in response to a changing environment Develop people through setting clear expectations, providing constructive feedback, and mentorship to achieve high levels of individual and team performance We'd like to review your application if you have: Must-haves (minimum requirements): Ten years of experience working as an engaging, versatile and strong leader to teams of medium to large scale in the IT Projects space Experience in the Oil and Gas industry business processes and their linkage to technology Good judgment and a pragmatic approach to troubleshooting and managing expectations, while developing and implementing solutions that optimize project lifecycle activities within the financial budget and through technical constraints Experience with project delivery frameworks and processes, with specific experience using Agile

(Scrum) and Waterfall methodology and practices  
Experience in one or more application domains (Upstream, Downstream and Enterprise applications)  
Proven experience with quality testing and measurement tools, and quality management in solution delivery  
Broad knowledge of quality strategy and framework, business, application, information, technical, infrastructure, data analytic and security architecture  
The ability to successfully work under tight project deadlines in an agile environment, and your strong collaboration skills enable you to build strong, positive relationships with diverse groups  
Strong conflict resolution, negotiation and decision-making abilities  
Alignment with Suncor values of: Safety above all else, respect, raise the bar, commitments matter and do the right thing

Preference for: A degree in Computer Science, Software Engineering, MIS or equivalent  
Exposure to working within Suncor's operating model  
Experience working in the ADEM Project Methodology

Where you'll be working, your work schedule, and other meaningful information: You will work out of our Calgary head office, located in the Suncor Energy Centre at 150 &ndash; 6th Ave S.W. Hours of work are a regular 40-hour work week, Monday to Friday, with the potential for extended work hours based on business needs. Some travel may be required on an infrequent basis based on project requirements

Why Suncor We are Canada's leading integrated energy company with a business portfolio that includes oil sands development and upgrading, offshore oil and gas production, petroleum refining, and product marketing under the Petro-Canada brand. Our global presence offers rewarding opportunities for you to learn, contribute, and grow in a variety of career-building positions. We live by the value of safety above all else &#8211; do it safely, or don't do it. Our strong track record of growth and a focus on sustainability mean tremendous potential for the future. Learn about our mission, vision and values. In addition to rewarding job opportunities, we offer an attractive employee package, including:

- Competitive base salary, compensation programs, and an annual incentive program
- Flexible benefits package
