

# Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

<b>Company</b>	Suncor	
<b>Location</b>	Fort McMurray, Alberta	
<b>Date Posted</b>	From: 2019-07-18	To: 2050-01-01
<b>Job</b>	Type: Full-time	Category: Resource Sector

### Description

LOCATION: Fort McMurray, Alberta (CA-AB)

JOB NUMBER: 29381 Why you should join us: Our Primary Extraction Maintenance Engineering team provides frontline engineering support to help us meet the day-to-day business demands of ore preparation and froth separation assets in our Base Plant site. We are looking for someone who is eager to gain practical, hands-on experience troubleshooting equipment, develop a strong comprehension of equipment strategies, collaborate and foster relationships across multiple disciplines while upholding our commitment to safety and the environment. You will get to perform meaningful work, which will allow you to build a strong foundation for a successful engineering career. You will use your expertise to: Liaise between our Maintenance and Reliability Engineering departments, clearly communicating ongoing plant issues, 'bad actors', asset upgrade opportunities/necessities, potential safety improvements, procedural advances, and recurring problems. Provide concise engineering scopes of work to support planned and unplanned activities. Use a questioning attitude to investigate equipment failures, determine root cause, and drive significant corrective actions to prevent reoccurrence. Support/participate in turnaround/outage activities. Lead or participate in continuous improvement initiatives by collaborating with field trades, and help formulate and follow through on the improvement initiatives. Assist reliability engineering with equipment strategy improvements. Assist in updating work practices and procedures.

We'd like to review your application if you have: Must-haves (minimum requirements): A Bachelor's degree in Mechanical Engineering. EIT eligibility with APEGAS. Strong verbal and written communication skills. The ability to build strong, positive relationships with diverse groups. The ability to anticipate potential problems and check for out-of-the-ordinary conditions, and have a strong sense of accountability. A continuous improvement mindset and are able to seek greater knowledge and understanding of the systems, process and hazards in the workplace. A zero-tolerance for shortcuts, and if the procedure is incorrect, you fix it.

Preference for:

- Oil and gas background
- Experience with CAD software

Where you'll be working, your work schedule, and other meaningful information: You will work out of our Base Plant Mine in Fort McMurray, Alberta. Hours of work are a regular 40-hour work week, Monday to Friday, with the potential for extended work hours based on business needs.

- This position is safety sensitive

Why Suncor: We are Canada's leading integrated energy company with a business portfolio that includes oil sands development and upgrading, offshore oil and gas production, petroleum refining, and product marketing under the Petro-Canada brand. Our global presence offers rewarding opportunities for you to learn, contribute, and grow in a variety of career-building positions. We live by the value of safety above all else; do it safely, or don't do it. Our strong track record of growth and a focus on sustainability mean tremendous potential for the future. Learn about our mission, vision and values. In addition to rewarding job opportunities, we offer an attractive employee package, including:

- Competitive base salary, compensation programs, and an annual incentive program
- Flexible benefits package
- Rewarding pension and savings plans

Stay connected to us:
