

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Pipeline Integrity Engineer / TechnologistReference Code: 59193

Location: Canada (CA) - Calgary, AB Job Category: EngineeringEmployment Type: Employee

Full-timeRelocation Eligibility: This position is not eligible for our relocation programApplication

Deadline: 08/06/2019 We all need energy. It warms our homes, cooks our food, gives us light, and gets us where we need to go. It also improves our quality of life in countless other ways. At TC

Energy, our job is to deliver that energy to millions of people who depend on it across North

America. And we take our job very seriously. Guided by our values of safety, integrity, responsibility and collaboration, we develop and operate our facilities safely, reliably and with care for our impact

on the environment. With our presence across the continent, our people play an active role in building strong communities. We're proud of how our hard work and commitment sets us

apart and benefits society, every day. We're looking for new team members who share our values and are ready to take on exciting challenges. The opportunity

The Canadian Gas Operations, Right-of-Way Management and Project Support team is seeking several experienced, focused and motivated engineer/technologist to join our team. In this role you

will be supporting multiple TC Energy pipeline integrity management programs by performing various engineering and technical analysis of its Canadian pipeline systems. The individuals will

work closely with multiple key internal and external stakeholders (i.e. technical Subject Matter Experts, Regulatory Compliance, Field Operations, external applicants). What you'll do

- Gather and analyze data in support of assessing and quantifying integrity threats to the pipeline

- Determine compliance to pipeline design requirements

- Perform Engineering Studies to determine the continued safe operation of the pipeline

- Review and assess development applications to identify future remediation work

- Collaborate with internal and external stakeholders to reach optimized solutions

- Define high-level work scope for remediation projects

- Provide technical support to other Pipeline Integrity Stakeholders as required

- Develop and update integrity related operating procedures to support the continual improvement of TC Energy's Pipeline Integrity Management Program

- Support program development and continuous improvement efforts to increase efficiency and enhance the quality of program deliverables

- Perform design reviews for pipeline projects
- Provide guidance to Engineers-in-Training and students

Qualifications and Education: Qualifications Self-motivated individual with excellent work ethic and strong desire to learn and develop Demonstrated analytical and decision-making skills, with the proven ability to collaborate and contribute in a team environment Excellent interpersonal and communication skills, both written and verbal Proven time management, prioritization and organizational skills Demonstrated ability to problem solve by applying engineering principles and developing effective solutions Education / Experience A Bachelor's degree in Engineering or equivalent technical diploma recognized by APEGA/ASET Must be registered, or eligible to register for professional designation Have a minimum of 4 years of engineering or equivalent experience In-depth knowledge of applicable industry Codes, Standards and Regulations related to pipeline integrity (e.g. CSA Z662, NEB's Onshore Pipeline Regulations and Damage Prevention Regulations) and experience in pipeline integrity would be considered an asset
