

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Link's Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Project ManagerReference Code: 60483

Location: Canada (CA) - Calgary, AB Job Category: Engineering; Project ManagementEmployment Type: Employee Full-timeRelocation Eligibility:

This position is not eligible for our relocation programApplication Deadline: 01/13/2020 We all need energy. It warms our homes, cooks our food, gives us light, and gets us where we need to go. It also improves our quality of life in countless other ways. At TC Energy, our job is to deliver that energy to millions of people who depend on it across North America. And we take our job very seriously.Guided by our values of safety, integrity, responsibility and collaboration, we develop and operate our facilities safely, reliably and with care for our impact on the environment. With our presence across the continent, our people play an active role in building strong communities.We're proud of how our hard work and commitment sets us apart and benefits society, every day. We're looking for new team members who share our values and are ready to take on exciting challenges. The opportunityReporting to the Engineering Manager, the successful candidate will be part of a multi-disciplinary team and responsible for the proposal, initiation, execution, and completion of capital projects for the Canadian Energy Assets. Project performance will be measured on the ability to deliver projects on schedule, within budget and in compliance with TransCanada project management procedures. The successful candidate will be a key contributor to the management of capital project implementation to achieve reliable operation and continuous improvement of all plant equipment located at TransCanada's power plant and unregulated gas storage facilities.The Project Manager is an individual contributor who will work closely with other groups and leads from Engineering and Project Management, Operations, Commercial, Supply Chain, Compliance, Legal and other internal/external stakeholders to plan, organize and execute complex capital projects.The Project Manager will provide strong technical, project management, organizational, and communication skills and will develop the knowledge of the systems, processes and tools required to plan and execute outages. What you'll do

- Lead the planning and execution of capital projects (e.g. plant modifications, upgrades and enhancements, and plant outages)
- Develop or coordinate investment valuations, cost estimates, decision summaries, risk analyses and conceptual plans, and preliminary and detailed design work
- Coordinate with operations and engineering to develop and execute project scope, budget, execution plan, schedule, resource requirements, permit applications, commissioning plan, pre-start safety review, documentation, drawing modifications, close-out of punch list items, and training where appropriate.
- Create project execution plans to encompass schedules, budgets, resource requirements, permits and regulatory requirements
- Coordinate or direct the work of external consultants and contractors
- Provide leadership and influence in the continuous development of project management tools and processes.
- Provide project management services in support of TransCanada's asset management initiatives
- Make independent decisions and communicate recommendations to management and other affected parties in a way that fosters consensus and facilitates efficient outcomes
- Must have unrestricted ability to travel within North America up to approximately 30 days at a time

Minimum Qualifications

- University degree in Engineering and P. Eng. license with Professional Engineers of Alberta or an equivalent governing body in Canada
- Minimum 6-8 years of progressive relevant field experience in power generation and/or gas storage facilities (i.e. installation, commissioning, operation, and maintenance).
- Previous project management experience considered an asset.
- Excellent oral and written communication skills including the ability to provide and present timely and relevant feedback/reporting to various stakeholders. Candidate will be asked to submit a technical writing sample
- Innovative, self-motivated, professional, and able to work without being under direct supervision and contribute in a fast-paced, multi-discipline team environment
- Proficient in reading and understanding mechanical discipline drawings including P&IDs, piping isometrics, general arrangements, mechanical system drawings
- Must possess a high level of attention to detail
- Must have strong analytical and problem-solving skills
- Must have good judgment and decision-making abilities
- Ability to work independently to organize, plan, coordinate, and manage multiple projects/tasks simultaneously including providing daily field support
- Ability to exercise leadership without formal authority and have demonstrated leadership skills for delegation, negotiation, influencing, and consensus building to coordinate work to meet objectives
- Ability to embrace and lead change
- Demonstrated familiarity with project management principles and practices
- Demonstrated proficiency in the use of PC-based computer systems and software applications with an emphasis on SAP, Microsoft Excel, Word, and

Project

Preferred Qualifications

- Recognized certificate or diploma in Project Management
- SAP experience
