

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Link's Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Project Engineer - MeasurementReference Code: 60799

Location: Canada (CA) - Airdrie, AB Job Category: EngineeringEmployment Type: Employee Full-timeRelocation Eligibility: This position is not eligible for our relocation programApplication Deadline: 10/17/2019 We all need energy. It warms our homes, cooks our food, gives us light, and gets us where we need to go. It also improves our quality of life in countless other ways. At TC Energy, our job is to deliver that energy to millions of people who depend on it across North America. And we take our job very seriously.Guided by our values of safety, integrity, responsibility and collaboration, we develop and operate our facilities safely, reliably and with care for our impact on the environment. With our presence across the continent, our people play an active role in building strong communities.We're proud of how our hard work and commitment sets us apart and benefits society, every day. We're looking for new team members who share our values and are ready to take on exciting challenges. The opportunityTC Energy's Canada Gas Operations group is looking for a Project Engineer to join our team. Reporting to the Manager Operations Services, Measurement Engineering, the Project Engineer is accountable for ensuring that multi-discipline engineering deliverables are supplied to projects according to the defined project scope, cost, and schedule working directly with the Project Manager and discipline engineers assigned to the project. What you'll do

- Project scoping
- Small scope electrical, instrumentation and control discipline engineering design
- Technical direction and oversight supporting the Company's internal and external engineering service providers in alignment with Company engineering standards and project requirements
- Validation that project scopes align to equipment integrity management strategies
- Provide project lessons learned supporting continuous improvement of Company standards, plans and procedures
- Assist in the implementation of design decisions formally to engineering and other contractors through the contract management of change process
- Prepare, assist and support the preparation of materials required by LNG Canada as part of their project development process
- Create and review construction RFP and contract documents

Minimum Qualifications

- University degree in engineering from an accredited university
- Registered, or eligible for registration, as a Professional Engineer with the Association of Professional Engineers and Geoscientists of Alberta (APEGA), or equivalent governing body
- Four (4) to 10 years of relevant experience
- An alternate combination of education and experience may be considered

Preferred Qualifications

- Background in facilities engineering relating to gas, some liquids pipeline facilities engineering experience may be relevant
- Experience in engineering management, specifically management of engineering contractors
- Demonstrated team player with ability to work with multiple teams
- Strong interpersonal and written communication skills
- Strong project management and organizational skills
- Mechanical systems and process knowledge and experience
- Field experience during project construction and commissioning
- Functional understanding of quality management and change management processes
