Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Job Summary
The Information Technology Solutions and Services (ITSS) Branch is the centralized authority for all matters pertaining to the automation and delivery of corporate IT services. We design and develop innovative information technology applications and systems and provide ongoing support of core information systems and services to enhance CSIS' ability to fulfill its mandate. The Programmer-Analyst is responsible for the development of innovative solutions and the maintenance of these solutions. Working in a highly dynamic technical environment, you will be providing innovative solutions to complex technological challenges. You will be developing and integrating software solutions with market leading software/frameworks, while collaborating with other teams and clients in analyzing and developing solutions. You will also be verifying and validating technology services prior to deployment by leveraging industry best practices, historical information, experience, tools, and processes.

Education

- Undergraduate or Masters degree and one (1) year of related experience
- Technologist diploma or a Professional technologist equivalency designation and two (2) years of related experience

Experience
 Candidates must possess a minimum of one (1) year of experience in software development / programming using JAVA. Candidates must also possess:
- Experience in the analysis, design, integration, programming, and testing of computer applications using a structured methodology.
- Experience in application development.
Underfill: Candidates who do not fully possess the experience required may be considered for this position and will be employed on an underfill basis until they reach the full working level of the position. A written examination will be administered for the evaluation of candidates.

Competencies

- Adaptability
- Interpersonal skills
- Organizational skills / multitasking
- Problem Solving
- Analytical skills

Conditions of Employment
 Not Applicable

Notes
 Various language requirements:
- English Essential
- French Essential
- Bilingual non-imperative BBB/BBB
- Bilingual imperative BBB/BBB
For non-imperative nominations, the offer is conditional upon achieving the linguistic requirement for this position within two (2) years. Salary is commensurate with qualifications and experience. Please note this is a Computer Systems (CS) Administration Group designated position, therefore the successful candidate may be eligible for an additional CS-related allowance of 4% of the annual salary.
