

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

As a Junior DevOps Engineer you will focus on creating solutions using tools and automation to improve operations. DevOps roles can involve a myriad of projects, including: enhancing and streamlining operational processes through automation and integration; modifying existing software to correct errors, adapt to new hardware, or to improve performance; analyzing user needs and software requirements to determine feasibility of design within time and cost constraints; using scientific analysis and mathematical models to predict and measure outcome and consequences of design; and much more. Fast-track career progression is a key focus of FDM, and our program will put you on a pathway that could grow into leadership roles working within multinational organizations.

No previous qualifications or STEM Field experience is required.

Experience

Degree or Diploma

A natural aptitude for technology and a strong desire to expand your technical skill set.

Able to commit to work for FDM for a minimum of two years working as an FDM consultant following the training period.

Eligible to work in Canada.
