

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Requisition ID: 197887

Join a purpose driven winning team, committed to results, in an inclusive and high-performing culture. The TeamScotiabank's Information Technology and Solutions provides global technology solutions support to each of our core businesses - Domestic Banking, International Banking, Global Banking & Markets and Global Wealth & Insurance. Our technology-based solutions enable Scotiabank to achieve sustained profitable growth and a competitive advantage. The Client Central technology team is an integral part of Global Technology Applications (GTA) team. We are comprised of high performing, energetic, results-oriented, and collaborative individuals who thrive in our dynamic and agile environment to deliver the best solutions to meet the needs of our customers. The Role We are looking for a Senior Software Engineer to join our team to help move forward our strategy and vision. As a Senior Developer in the Client Central technology team, you will be in a high-impact role, working alongside a group of technology professionals responsible for technical design, development, and delivery of various solutions to resolve multi-dimensional business problems to support business needs. We are looking to fill our team with forward thinking individuals who embrace change, are passionate about their profession, are flexible, curious, continuous learners and who want to achieve challenging goals and have long-lasting impact on our customers and the Bank. You will be a hands-on technologist with a results-oriented and curious mindset and deep technical skills. You will provide the delivery of technical solutions, while ensuring they are delivered on time, on budget, and with high quality. Is this role right for you In this role you will:

- Responsible for the design, development and successful implementation of effective and quality solutions to support client data processing, reporting and analytics
- Work within a big data ecosystem (GCP, Hadoop) to design and deliver complex software components and applications
- Analyze complex business requirements and transform them into robust technical specifications
- Adapt to change quickly and adjust work accordingly in a positive manner
- Effectively contribute to and collaborate with a dynamic, agile development team, working to build a high-performing team in an inclusive work environment
- Collaborate and clearly communicate with partner BA, QA and business teams

Do you have the skills that will enable you to succeed in this role We'd love to work with you if you have:

- 5+ years of relevant software development and IT industry work experience, with focus on big data technologies
- Disciplined in development methodology and familiar with software development technologies and concepts. Hands on experience in design, development and successful deployment of large-scale projects from end to end
- Proven analytical and problem-solving abilities. Candidate should be able to work both independently and in a team-oriented collaborative environment, by understanding the design documents and handling application development, unit testing and QA support
- Excellent programming skills in Java and Python
- Experience with a wide spectrum of big data technologies including Hive, Spark, HQL, Spark, SQL, Hadoop/HDFS
- Practical expertise using agile delivery with deep understating of core agile concepts, and continuous delivery and deployment methodologies (GitHub, Bitbucket, Maven, Jenkins, Artifactory, Airflow, etc)

- Strong SQL knowledge and experience working with relational databases, including database modeling
- Experience with GCP (Google Cloud Platform) is a plus
- Knowledge of Kafka and NiFi is a plus
- Knowledge and experience in Capital Markets and Master Data Management would be an asset

What's in it for you

- We have an inclusive and collaborative working environment that encourages creativity, curiosity, and celebrates success!
- We provide you with the tools and technology needed to create meaningful customer experiences
- You'll get to work with and learn from diverse industry leaders, who have hailed from top technology companies around the world
- We offer a competitive total rewards package that includes a base salary, a performance bonus, company matching programs (on pension & profit sharing), generous vacation, personal & sick days, personal development funding, maternity leave top-up, parental leave and much more.
