

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Requisition ID: 198717

Join a purpose driven winning team, committed to results, in an inclusive and high-performing culture. In the role of Manager, Response Analytics and Insights, you bring a specialized data science background to cyber-fraud threat management. You provide direct incident support managing tactical analysis in response to account-level attacks. You coordinate and solution rapid data insights to react to complex account-level attacks and direct specialist resources to contain exposure. In addition, you provide key support to prevention and early-detection strategies with other highly skilled cross-domain data and cyber-fraud professionals. You also collaborate with partners in fraud, digital, and cybersecurity operations to ensure appropriate thresholds are set for alerts, and exception reports that prompt early-detection of otherwise large-scale account-level attacks. Is this role right for you In this role you will: Transform data and information into insights that inform tactical response to incidents as well as strategic decision-making. Define and track key performance indicators (KPIs) related to incident management. Regularly report on team performance and effectiveness. Develop and maintain interactive dashboards to ensure effective situational awareness and visibility to prevention and response metrics. Lead Cyber-Fraud Attack Surface Dashboard activities and feedback on efficacy of controls managed upstream of fraud, specifically including cybersecurity controls applied to digital properties where users may apply for or access an account at Scotiabank. Lead future direction on data strategy including: sources, data design, data integrity and data and analytics tools. Develop and maintain data models and structures to support advancing capabilities, creating and testing alternative methodologies and analysis techniques. Support and encourage the identification and escalation of systemic issues, reoccurring problems, and unrelated threats/vulnerabilities to the appropriate business, risk, or control owners through the team's Problem Management function. Support the build and delivery of a roadmap that creates new capabilities and capacity for early detection and response to cyber-fraud incidents. The capabilities created through this roadmap empower our incident response team, enabling the best visibility, situational awareness, and use-case automation. Support defining the expertise, procedures, data, technology, and relationships the Response Analytics and Insights team need to be successful in prevention and early detection of account-level attacks. Foster and maintain ongoing team awareness of the cyber-fraud threat landscape, including through certification, continuing professional education (CPE), industry group participation, threat intelligence feeds, and direct research.

Do you have the skills that will enable you to succeed in this role We'd love to work with you if you have:

- Demonstrated knowledge of incident management, threat-intelligence, customer identity and access management (CIAM), and payment card security (PCI DSS) business functions.
- Related cybersecurity industry certifications (ex. CISSP, CISM, CISA, GCIH, etc.) are an asset.
- One or more relevant data and analytics certifications (ex. Microsoft DP-500, SAS Certified Data Scientist, Microsoft Certified: Azure Data Scientist Associate).
- Bachelor's degree in computer science, cybersecurity, or similar is an asset.
- Bilingual in Spanish is an asset.

What's in it for you

- Continuous learning and advancement via workshops with external providers, courses, and conferences.
- Lead strategic projects with a significant impact on business line growth.

- A culture that promotes teamwork and cross-functional collaboration to achieve business goals. Inclusive workplace that values diversity of thought, background, and experience
- Opportunity to work and collaborate with teams and partners across different geographies, enriching professional experience and understanding of global payment markets.

Location(s): Canada : Ontario : Toronto

Scotiabank is a leading bank in the Americas. Guided by our purpose: "for every future", we help our customers, their families and their communities achieve success through a broad range of advice, products and services, including personal and commercial banking, wealth management and private banking, corporate and investment banking, and capital markets.
