

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Requisition ID: 199040

Join a purpose driven winning team, committed to results, in an inclusive and high-performing culture. The Director, Finance Technology, will be responsible for the strategic direction, leadership and oversight of the Global Finance SaaS Technology team with the focus of modernization of application portfolio and delivery of solutions to support the business needs globally. You provide expertise and engineering excellence as an integral part of an agile team to enhance, build, and deliver trusted market-leading technology products in a secure, stable, and scalable way. Leverage your advanced technical capabilities and collaborate with colleagues across the organization to help solve complex business issues from strategy to execution. We are looking for a results-oriented, creative, highly motivated individual with a curious mindset, strong technical and leadership skills, deliver excellence, passionate for challenges and want to contribute to the success of the Bank. Is this role right for you? In this role you will:

- Develop integration strategy and solutions for connecting and securing SaaS applications such as Anaplan, SAP/HR, Oracle Fusion, Workday with multiple Cloud IaaS (including GCP, OCI and Azure)
- Engage & cultivate relationships with key stakeholders from Global Finance, Canadian Banking, International Banking, Wealth Management, Global Markets and Banking, Data Office and IT&S
- Prioritizes, negotiate, and remove obstacles to ensure successful Finance SaaS program launches.
- Author architectural/Dataflow patterns to help assessment teams improve and develop their processes.
- Improves processes, demonstrating Financial Services industry knowledge and knowledge of applications of at least one of the following focus areas: finance transformation, performance management, financial systems optimization, shared service and outsourcing, talent management, and business intelligence and performance management software tools.
- Understands the implications of integration with core financial services systems like Core Banking, GL and Planning systems.
- Demonstrating business acumen that can interpret and translate goals into technical specifications, delivering thought-leadership of specific technologies, and driving technology change.

Do you have the skills that will enable you to succeed in this role? We'd love to work with you if you have:

- A passion for making developers more efficient through DevOps, CI/CD, and Infrastructure as Code
- Experience with Infrastructure Automation and Infrastructure as Code (GCP, OCI and Azure)
- Experience creating and manipulating YAML files.
- Experience as a Linux system administration
- Experience with container platforms - Ideally Kubernetes, Docker, Google Anthos and Cloud Run
- Working on cloud platform and solutions in Applications or Data technologies
- Designing and developing large scale data solutions using GCP services:
- DataProc, Dataflow, Cloud Bigtable, BigQuery, Cloud SQL, Pub/Sub, Cloud Data Fusion, Cloud Composer, Cloud Functions, Cloud storage, Compute Engine, Looker and Cloud IAM

- Experience in system performance and security hardening
- Experience in monitoring, alerting and logging on high availability systems.
- Experience with SaaS applications such as Anaplan, SAP/HR, Oracle Fusion, Workday and PowerBI on Azure
- Experience with Terraform, Jenkins, GitHub, Ansible, Artifactory
- Curious and experimental mindset to drive innovation amidst uncertainty.

What's in it for you
