

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Requisition ID: 200878

Join a purpose driven winning team, committed to results, in an inclusive and high-performing culture. Small Business Digital Squad is looking for a Software Architect who will be a key player in architecting the future technology road map for Small Business's future state technology road map. This candidate will work closely with Product partners, business and other Scotia Digital technology teams to provide scalable technology architecture which will not only serve Canadian banking but will also align with International Banking. Is this role right for you In this role you will:

- Provide thought leadership, subject matter expertise to business and technology leaders.
- Design architectural solutions, roadmaps that are aligned to business and technology strategy, enterprise standards and best practices.
- Develop and maintain technology target state and roadmap for application portfolios in collaboration with Business Leads, Chief Architect and Application Portfolio Owners.
- Collaborate with multiple teams Bank-wide on architecture design and follow Bank's Architecture Review Board governance processes.
- Present solution design in a way that establishes trust relationships, persuades stakeholders and achieves understanding and consensus at all levels.
- Maintain a sharp focus on system security and reliability while developing architecture designs for products and services.

Do you have the skills that will enable you to succeed in this role We'd love to work with you if you have:

- 10+ years of IT experience with clear progression through various roles leading with at least 3 years of experience providing hands-on architectural design for software applications with proven track record of building a product and taking it to market.
- Strong understanding of frontend development, specifically microapp design patterns.
- Expertise with Microservices, MERN stack, NodeJS/ExpressJS and MongoDB.
- Bachelor (equivalent or higher) degree in Computer Science, Engineering or related discipline.
- Experience working in Financial Services domain highly desirable.
- Experience in designing/developing cloud native solutions in GCP, Azure, AWS platforms.
- Experience in architecting end-to-end solutions involving multiple technology platforms and developing solutions leveraging established architecture/design frameworks.
- Practical experience in addressing data management challenges as part of architecture solution development.
- Experience in Security Architecture on the areas of authentication, authorization and auditing.
- Hands-on experience in Microservices design, Event driven architecture, ETL and data solutions and System resiliency engineering.
- Proven hands-on experience in leading Proof of Concept / Proof of Technology initiatives.
- Experience in Agile, DevOps and iterative software development.
- Excellent interpersonal, communication, and influencing skills with the ability to build and foster relationships with business partners, project stakeholders, strategic technology partners and external vendors.
- Ability to collaborate across organizational boundaries, build relationships, and achieve broader organizational goals.

- Must be flexible and ready to adapt to a dynamic environment.
- Experience In Pega, Salesforce architecture design and implementation is preferred but not mandatory.

What's in it for you
