

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Requisition ID: 201119

Join a purpose driven winning team, committed to results, in an inclusive and high-performing culture. Data Analyst Advisory: We are looking for an experienced Data Analyst to join our team. Is this role right for you? In this role you will:

- Work with business users to obtain data requirements and analyze source systems data.
 - Design and develop conceptual, logical and physical data models for the operational and analytical databases
 - Work closely with the technical and application architects, and developers to implement the solution architecture
 - Communicate physical database designs to, and work with, database administrator to implement databases
 - Document data flows, identify appropriate data sources, entities, relationships and redundancies
 - Manage data integrity and data quality.

 - Maintain technical & business metadata. Generate metadata for Hadoop ingestion for different frameworks.
 - Design data structures and document data meanings, definitions and intended use, work with various departments/leaders and data stewards to make the metadata available
 - Define and document the data architecture for operational databases, reporting and provisioning platforms, including the physical components and their functionality
 - Support data strategies, standards, guidelines data quality process and governance across the enterprise
 - Provide leadership in researching and architecting emerging technology solutions to meet business objectives
- Do you have the skills that will enable you to succeed in this role? We'd love to work with you if you have:
- Relational and dimensional data modeling and database design, Erwin (Data modeling) skills.
 - Strong SQL and Hive (Hadoop) experience.
 - Knowledge of data architectural approaches, patterns and emerging technologies (RDBMS, Hadoop and Cloud)
 - Ability to translate business needs into technical solutions. Strong Analytical skills.
 - Experience creating architecture and strategy artifacts
 - Experience of XML, JSON, Copybook, CSV files ingestion
 - Experience working in Agile environment
 - Domain Knowledge in financial Services and enterprise functions
 - Knowledge of database administration, database performance tuning, source & target data structures, ETL processes & products
 - Knowledge of Data Governance process for metadata and lineage management

What's in it for you
