

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Requisition ID: 201253

Join a purpose driven winning team, committed to results, in an inclusive and high-performing culture. The Global Wealth Engineering Client Technology team is transforming the digital experience for its clients. The team partners and works closely with the Scotia Digital team to bring world-class digital experiences for all Scotia Wealth Management channels. The team plays a key role to help investors manage their investments and reach their financial goals.

Is this role right for you In this role you will:

- Developing new user-facing features using React.js
- Building reusable, scalable, robust components and front-end libraries for future use
- Translating designs and wireframes into high quality code
- Optimizing components for maximum performance across a vast array of web-capable devices and browsers
- Working closely with architect, UX designer, other developers and product owner on software architecture, design, dependencies, and codes maintainability
- Strong problem-solving and analytical skills

Do you have the skills that will enable you to succeed in this role We'd love to work with you if you have: Must Have Skills:

- 3 + years of experience of React.js and its core principles and React ecosystem JSX of react components life cycle.
- 3 + years of experience with popular React.js workflows (such as Flux or Redux) and data structure libraries (e.g., Immutable.js)
- 3 + years of experience and Strong proficiency in JavaScript Fundamentals and newer specifications of EcmaScript (ES6+), including DOM manipulation and the JavaScript object model.
- 2 + years' experience (1 or 2 recent projects) on front end optimization techniques such as Lazy Loading, Asynchronous Module Definition, Callback and Promises, Closures, Image Compression
- 2 + year experience and good knowledge of NodeJS (Yarn) to NPM registry libraries/packages.
- Strong working experience building for mobile web (such as Mobile First, Responsive and PWA)
- Up to date knowledge of the React ecosystem including Hooks, Suspense, and familiar with functional based programming.
- Unit testing with JEST or similar tool

Nice-To-Have Skills: Familiarity with RESTful APIs, GraphQL and ExpressJS framework. Experience with Continuous Development or Continuous Integration is a plus. Experience with Server-side Java Development is a plus. Financial Industry is a plus, but technology experience will be prioritized. Experience and knowledge of isomorphic React and babel React webpack are pluses. Knowledge of modern authorization mechanisms, such as JSON Web Token are a plus. Experience with code versioning tools such as Git, Bitbucket. Familiarity with modern front-end build pipelines and tools. Working experience in Microservices or Cloud based (GCP or Azure).
