

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Description

The Implementation Manager (Power), reporting to, Senior Manager, is accountable for managing capital projects relating to implementation of Northwestel power, green energy initiatives and building systems driven from an understanding of business needs. The manager determines the most cost-effective method for accomplishing project needs from general information, user requirements, planning input; resulting in the development of detailed engineering plans, estimates, budgets, specifications and schedules to evaluate and implement new systems and technologies.

Employment Equity

Northwestel values diversity in the workplace and is committed to the goals of Employment Equity. We strive to achieve a skilled workforce that is representative of the population we serve, and as a Northern company, we are committed to the employment and career development of our Indigenous peoples. Please clearly indicate on your application if you are an Indigenous person, a woman, a person with a disability, or a visible minority if you wish to receive hiring preference.

Specific Accountabilities

Implementation(75%)

Designs and develops detailed plans according to company standards for capital projects including unit testing & exception handling, developing installation specifications and detailed cost estimates including support packages consisting of support procedures, training, spares and vendor support.

Creates implementation schedules, procure materials, equipment, engineering hardware and software, develops work schedules and priorities (for internal staff and/or contractors).

Ensures work is being done to specifications and meeting timelines set out, monitoring of capital budget expenditures; performs systems testing and acceptance of project. Evaluates skills and engages either internal personnel (or) contractors to perform work functions. Conduct work site inspections and maintains build quality through audits.

Documents the work throughout the life of the project as well as file any "as-built" network construction.

Submits Requests for Change (RFCs) including Methods of Procedures and Roll Back plans for Network Changes associated with project work; as well as participating in Change Advisory Board meetings as a Subject Matter Expert.

Provides third level technical support to various projects and areas of the organization.

Capacity and Availability Management (20% of role)

Manages capacity and availability of power, mechanical and building assets to ensure planners have information to develop technology business plans.

Tracks and generates asset information required for planning purposes including predicting replacement, enhancement of assets based on age, return on investment, performance and capacity while developing best practices (CNP's).

Provides support through Incident Management including assisting in resolution of any escalated incidents and resolution of reoccurring incidents or problems with the current network.

Business Planning (5% of role)

Provide input and solutions to Strategic planners, steering teams, the portfolio management team. The Implementation Manager is a key contributor to the strategic planning process.

Develop Implementable plans including descriptions of the underlying business need and solution, as well as a High

Level estimated project plan including resourcing, cost, timeline, and business value.

Assess technological business needs on a case by case basis, utilize that assessment to develop business cases for technological solutions.

Maintain technology menu through approving devices for specific applications including IOS versions and levels; maintain, support and enforce technology approval process.
