Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

About The Role

Join our IT Operations Team and ensure the security and resilience of our clients' IT estates.

We equip you with the technical capabilities to support business-critical horizontal and vertical responsibilities, as well as specialist areas such as infrastructure and networking.

This Practice will have you diving into diverse, rewarding roles on client assignments where you will be supporting on-premises, hybrid, and cloud infrastructures. You will contribute to incident management, lead technology change or transformation, and play a key role in enhancing system reliability through continuous integration and automated deployments. You will be facilitating long-term operational success for our clients.

About this role

We welcome candidates from all degree backgrounds, no STEM experience required. Show us your passion for tech and we'll show you the skills for success on your career journey.

You'll join FDM as a Consultant within our IT Operations Practice, where you'll start your journey developing key skills in a practice-based learning environment for 6 weeks. You will then be able to start delivering large-scale projects for our clients across a wide range of industries. You could be taking on roles such as Production and Application Support Analyst, DevOps Engineer, System and Network Administrator or Site Reliability Engineer, with access to continuous upskilling and career development opportunities.

Where ambition meets opportunity

At FDM we find driven people from diverse backgrounds. Dedicated to your continuous growth, we offer a non-linear career journey with our Skills Lab helping guide you to the future you want.

Your skill sets will grow. Clients will value your increased expertise. And your career will thrive exponentially.

Experience

About You:

Minimum Qualifications

Bachelor's degree or diploma

Excellent communication skills and proven ability to work in a team

Demonstrable interest and desire to work in technology

Able to commit to work for FDM for a minimum of two years as a Consultant following the initial training period

Eligible to work in Canada

Desirable Technical Qualifications

While proficiency in the following areas is not required, familiarity with any of the below will serve as a significant asset:

IT Service Management

Agile Methodologies

Operating Systems such as Linux and Windows Server

Python

Artificial Intelligence

Networking

Database management with SQL

Cloud technologies
Information Security
Infrastructure as Code (Terraform)
Containerization (Docker)
Orchestration (Kubernetes)
CI/CD pipelines (Jenkins)
Please note all client assignments require hybrid working in client offices in, but not limited to, Toronto, Montreal, Halifax, Vancouver and Calgary.
