

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

About Toronto Metropolitan

At the intersection of mind and action, Toronto Metropolitan University (TMU) is on a transformative path to become Canada's leading comprehensive innovation university. Integral to this path is the placement of equity, diversity and inclusion as fundamental to our institutional culture. Our current academic plan outlines each as core values and we work to embed them in all that we do. TMU welcomes those who have demonstrated a commitment to upholding the values of equity, diversity, and inclusion and will assist us in realizing the benefits of embedding these values into the work at every level and in every unit of the university. In addition, to correct the conditions of disadvantage in employment in Canada and to bring lived experiences to the work, we encourage applications from members of equity deserving groups that have been historically disadvantaged and marginalized, including First Nations, Metis and Inuit Peoples in Canada, First Nations Peoples in the United States, racialized people, Black people, persons with disabilities, women, and 2SLGBTQ+ people. Preference will be given to candidates with lived experiences as people from equity deserving groups, as well as experience working with these communities with which the University works every day. Please note that all qualified candidates are encouraged to apply and we welcome newcomers and immigrants to Canada. In April 2022, the university announced its new name of Toronto Metropolitan University. Learn more about our next chapter. The team

Magnet, housed at Toronto Metropolitan University, stands at the forefront of social innovation in the labour market ecosystem. As a Centre of Innovation, their mission is to transform the future of work through strategic collaboration and the development of digital solutions. They do this by leveraging a vast network of partners and harnessing cutting-edge technologies to address emerging workforce challenges, fostering a more inclusive and dynamic economic landscape across Canada.

The Opportunity

Magnet is looking for a Full Stack Developer to join the team and lead the design and development of business-critical databases, web and mobile applications that provide information and statistics reporting relevant to the monitoring of Magnet's key performance indicators. As a Full Stack Developer, you will provide the day-to-day information system support for the Magnet under the general guidance of the Director, Marketing and Program Advancement. You will troubleshoot and set up a variety of computer, mechanical and electronic based technologies as well as provide technical advice and support to Magnet staff and team members. Other responsibilities will include:

- Working with management and stakeholders to define application requirements, conducts needs analysis, identifies potential strategies and solutions, and provides work effort estimates.
- Providing regular updates to the management team on project status, current and impending issues and recommending action plans throughout the production, testing and implementations phases.
- Adhering to guidelines and policies introduced and governed by the university's Chief Information Security Officer on the technical design and implementation of all projects.
- Researching, evaluating and recommending new or upgrades to equipment, hardware and software; developing and presenting recommended plans to the Director, Marketing and Program Engagement on equipment purchases and

modifications.

- Partnering with internal and external stakeholders, for guidance on system issues resolution and specific project milestones.
 - Providing technical expertise and advice on overall IT procedures and methods; ensuring that Magnet adheres to the university's IT-related policies, and recommending, implementing and enforcing Magnet specific policies in relation to information systems.
 - Providing user training on internally- and third party-built software, as required.
 - Assisting management with the evaluation of new technologies and software vendor products. Researching, analyzing and assessing existing and emerging technologies and their use in an educational environment.
- Qualifications To help us learn more about you, please provide a cover letter and resume (including sample of your work, if available) describing how you meet the following required qualifications:
- Completion of a degree in Computer Science, Computer Engineering or a related field.
 - A minimum of three years of relevant work experience in both computer applications and infrastructure projects is required to be able to analyze, design, implement, test and maintain information systems.
 - Experience with full stack development, working with various modern libraries and frameworks.
 - IT Project management experience.
 - Strong knowledge of programming languages (e.g. PHP, JavaScript, JSON, SQL, and SAML).
 - Knowledge of Wordpress.
 - Strong understanding of information system architecture, integrating third party Application Programming Interface (API), and debugging large program files.
 - Knowledge of frontend code and database layer.
 - Knowledge of code versioning tools to maintain code integrity and organization.
 - Understanding and implementation of security and data protection.
 - Creating servers and databases for functionality.
 - Solid oral and written communication skills for report writing, making recommendations and general correspondence, facilitating meetings, workshops, etc.
 - Strong interpersonal relationship skills to facilitate client and team meetings, representing the Magnet with regards to facility and systems management and enhancement with internal and external stakeholders on specific project milestones.
 - Strong commitment to client service, especially staff, student, faculty and external stakeholders.
