

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Techy Logs Software Inc., located at 100 Consilium Place, Scarborough, ON M1H 3E3, is a web design, web development, product management, marketing, and graphic design company. The Company is looking to urgently hire an 'Application Support Analyst' (NOC 22221) to provide technical support, customer support and trouble shooting.

Job Duties of this position include:

Oversee the installing, configuration, and implementation of computer applications.

Evaluate an organization's existing software and application setup and identify areas for potential improvement by making application changes.

Consult user guides, technical manuals and other documents to research and implement solutions to address technical issues.

Provide ongoing assistance for application users, troubleshoot and resolve technical problems, and install/update necessary software and hardware to enhance productivity.

Update customer data and generate monthly reports.

Provide assistance and training to users facing difficulties, including setting up equipment for employee use, installing cables, operating systems, and software.

Configure user settings, assist with software progress, and handle hardware devices.

Set up new equipment and upgrade existing systems. Assist in re-designing web pages, etc.

Train new staff on new systems and facilitate the setup of Video Conference equipment for interactions with overseas customers/vendors.

Conduct regular maintenance and security and backup checks to ensure the protection of confidential data.

Recommend selection and customization of applications to best align with user needs and high-level goals related to budget and productivity.

Maintain a proactive approach to identify and resolve technical issues promptly, contributing to the overall efficiency of the company's operations.

Job Type: Permanent full-time position.

Experience

2-3 years' experience in a similar role

Education Requirements

College, CEGEP or other non-university certificate or diploma from a program of 3 months or less than 1 year

Essential Skills

Ability to work independently.

Self-motivated, high-energy, and flexible performer who can thrive in a fast-paced environment.

How to Apply

Interested candidates may apply via email to: hr@techylogs.com
