

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

We are looking to add a talented and enthusiastic Geomatics Technologist specializing in spatial data processing to our team. In this role, you will benefit from the support of industry professionals while working on exciting and challenging projects that make a meaningful difference in many communities. We are looking for someone who shares our values and is excited to provide a high level of service. Coupled with the diverse learning and project experience opportunities, do you see yourself excited to contribute to...

- Processing spatial data deliverables using a variety of software, including but not limited to Rock Robotic LiDAR programs, HydroMagic SONAR processors, terrestrial scanner softwares, Trimble Business Centre, and Civil 3D.

- Supporting and growing the Geomatics team through the learning and implementation of new technologies.
- Review, manage, and process LiDAR, SONAR, and terrestrial data returns.
- Interpreting field data and notes and providing project documentation.
- Working collaboratively with project teams to ensure timely, high-quality work.
- Other duties and responsibilities as required.

Experience

The ideal candidate will be a recent graduate with up to 3 years of experience with a diploma or degree in Geomatics, Survey Technology, or a related field. The core skills that will help you succeed here include:

- You have proven experience using a variety of software, with experience using Rock Robotic, Trimble Business Centre, and Civil 3D being considered an asset.

- You are interested in LiDAR, SONAR, and terrestrial data processing.
- You are a team player, embrace the notion of integration, and thrive in a team-oriented environment.
- You are an effective communicator, both verbal and written, allowing you to successfully interact with team members and clients.
- You seek to build and contribute to continuously looking for ways to improve and innovate.
