

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Ministry of Water, Land and Resource Stewardship
Victoria (Hybrid)

Flexible work options are available; this position may be able to work up to two (2) days at home per week subject to an approved telework agreement.

Water Management Engineer

\$77,718.46 - \$103,695.05 annually, plus 6.5% recruitment and retention adjustment.

The Ministry of Water, Land and Resource Stewardship is accountable for integrated land and natural resource management of water, land, fish and wildlife. The ministry is responsible for implementing integrated decision-making on these resources in partnership with First Nations, communities and other ministries.

The Water Management Engineer provides professional engineering guidance and expert technical advice to ministry staff, local authorities, federal agency reps, First Nations officials and British Columbia residents for the engineering, planning and management of the Water Allocation Program and water licensing applications.

For information about the Indigenous Applicant Advisory Service, please visit: Indigenous Applicant Advisory Service - Province of British Columbia (gov.bc.ca).

Experience

Qualifications for this role include:

- Master's degree in civil engineering, water resource engineering or other directly related natural resource field, OR
- Bachelor's degree in civil engineering, water resource engineering or other directly related natural resource field, PLUS two (2) years directly related experience.
- Registered or immediately eligible for registration as a fully qualified Professional Engineer with the Engineers & Geoscientists of British Columbia (EGBC).
- Experience providing professional engineering expertise in the planning, design, maintenance and operation of water management systems.
- Experience conducting structural and design assessments and preparing supply management

plans.

- Experience in forecasting, monitoring and analyzing water management systems.
- Experience providing professional, engineering or scientific expertise, advice and recommendations to executive and senior management, and to others engaged in the delivery of water management programs, initiatives or activities.
- Experience developing program and/or operational plans; preparing professional engineering reports; and leading research strategies and projects associated with water resource management.
