

# Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

### Description

As a Junior Software Developer with FDM, you will undergo industry specific training and continue your career journey as an FDM consultant by working for one of our globally recognized clients. Some common positions you could take on include Front-end Developer, Back-end Developer, Full Stack Developer, DevOps Engineer and more.

As a Software Developer your main role will be to solve problems, upgrade existing systems and improve efficiency for the overall success of large software development projects. You will use your coding and creative thinking skills to impact the development and delivery of technological solutions for businesses. Your range of responsibilities will include writing, developing, testing and reviewing code in order to optimize existing applications and fixing defects.

This position is ideal for those hoping to secure an entry-level job. No previous qualifications or STEM Field experience is required.

### Experience

Minimum Qualifications

Degree or Diploma

A natural aptitude for technology and a strong desire to expand your technical skill set.

Exposure or familiarity with one or more programming languages (Python, Java, C, C++, C#).

Exposure to one or more operating systems (Microsoft, Linux).

Understanding of database and SQL.

Eligible to work in Canada.
