

# Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

### Description

Machinists set up and operate a variety of machine tools to cut or grind metal, plastic or other materials to make or modify parts or products with precise dimensions.

#### Main Duties

This group performs some or all of the following duties:

Read and interpret engineering drawings, blueprints, charts and tables or study sample parts to determine machining operation to be performed, and plan best sequence of operations.

Repair machine tools and parts.

Set up, operate and maintain a variety of machine tools including computer numerically controlled (CNC) tools to perform precise, non-repetitive machining operations such as sawing, turning, milling, boring, planning, drilling, precision grinding and other operations.

Maintain, repair and calibrate precision measuring instruments.

Verify dimensions of products for accuracy and conformance to specifications using precision measuring instruments.

Set up and operate conventional and computer controlled machine tools.

Compute dimensions and tolerances and measure and lay out work pieces.

Document and report deviations from specifications and tolerances.

Maintain inspection records and complete inspection reports.

Equipment and machinery experience

Boring machines

Milling machines

Use computer numerical control (CNC) machines

### Experience

5 years or more of experience as a machinist, tool and die maker or machining tool operator is required.

### Education Requirements

Completion of secondary (high) school graduation certificate

### Work Environment

Automotive manufacturing

General manufacturing
