Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

We are recruiting enthusiastic, bright, and curious people for the following roles:

Computer Network Exploitation Analysts

Network or Cyber Security Specialists

As a Computer Network Exploitation Analyst, you will be part of a collaborative team conducting online operations against foreign threats. Your tasks will include:

Gaining access to networks of foreign targets

Identifying and acquiring information from foreign networks

Enabling exploitation and collection operations

Conducting operations that degrade, disrupt, influence, respond to or interfere with threats to Canada

As a Network or Cyber Security Specialist, you will be part of a collaborative team managing systems and infrastructure. Your tasks will include:

Designing, building, operating, or configuring systems and infrastructure with services such as networking, compute, storage, and tooling.

Coordinating with internal teams to ensure system integration.

We are an inclusively elite team. There are certain aspects of these roles that you will not find anywhere else, that no other organization can offer. We require you to have a foundation of knowledge in computer networking and cyber security concepts, but we can offer you world-class training to supplement the mission-specific details.

Area of selection

Open to Canadian citizens who self-declare as belonging to one, or more, employment equity groups, as defined by the Employment Equity Act:

Women

Persons from racial or ethnic groups

Experience in one or more of the following areas

Network administration

System administration

System administration

Cyber security

Software development

Digital forensics

Penetration testing

Network analysis

Network or security operation

Vulnerability research or analysis

Experience

Competencies

The following technical, behavioural and leadership competencies will be assessed at a later date. You do not need to include information about them in your application.

Technical competencies

Network Analysis

Cyber Security

Behavioural competencies

Accountability/autonomy

Cognitive thinking skills

Leadership competencies

Achieving results

Collaboration

Education Requirements

You must have either one of the following:

A university degree or college diploma in a field related to the position, such as (but not limited to) Computer Science, Engineering, or Mathematics; OR

An acceptable combination* of education, training and/or experience.

*A high school diploma with at least 3-5 years of recent** experience in one or more of the areas listed below. Specific dates must be included in your application and references that can validate this information may be required during the recruitment process.

**Recent is defined by experience acquired within the last 5 years.

Note: The educational program must be recognized in Canada, and you must be able to provide proof of education credentials. Students graduating within the next twelve months are eligible to apply.
