Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Closing Date (MM/DD/YYYY):07/09/2024Worker Type:PermanentLanguage(s) Required:EnglishSalary Range (plus eligible to receive a performance based incentive, applicable to position) :$134,505 - $181,979Proven leader and technology expert needed

With your strategic mindset and technical expertise, youâ€™ll guide and manage the entire technology stack of AgExpert. Youâ€™ll be responsible for ideation, research, design, analysis and development of new releases; plus, youâ€™ll support and maintain existing applications.What youâ€™ll do:
- Lead and mentor the AgExpert software development team, including managing project planning, goal setting, prioritization, budgeting and employee resourcing
- Ensure information and data-related risk is effectively managed
- Use inclusive design principles to improve customer interactions and journeys
- Manage internal and external technical and product collaboration with product development team, lifecycle management analysis, version management and new product ideation
- Lead the architecture, design and development of robust, maintainable and scalable API solutions using the latest technologies and best practices to provide an exceptional customer experience
- Support, maintain and enhance existing processes and systems
- Research and recommend enhancements to existing applications, third-party software, emerging technologies and AgExpert user segments
- Maintain and assess the health of the product delivery framework
What weâ€™re looking for:
- Strong communicator able to effectively explain and simplify complex concepts
- Proven leader passionate about helping others succeed
- Relationship-builder able to connect with a variety of internal and external stakeholders
- Strategic thinker who can trouble-shoot issues and develop solutions to complex problems
What youâ€™ll need:
- A bachelorâ€™s degree in agriculture, computer science, business or commerce and at least 10 years of experience (or an equivalent combination of education and experience)
- Extensive knowledge of the agriculture and technology industries
- Expert-level proficiency in one or more technology stacks/languages and the ability to deliver very complex solutions
- Understanding of the majority of FCCâ€™s key technologies
- Expertise in common design patterns and when to apply them
