

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

We are seeking an experienced cyber security leader to join our team. As the Manager of Cyber Security you will be responsible for the execution and delivery of the strategic cybersecurity roadmap, ensuring the protection of our technology and information assets, and leading a talented team of cyber security professionals. Your expertise in cyber security, risk management, and governance will play a pivotal role in crafting our security posture to stay ahead of evolving threats. If you are a forward-thinking leader with a proven track record of success in cyber security, we invite you to be a driving force in securing our digital landscape.

What you will do:

- Lead the execution of the cyber security strategy and program
- Manage an engaged and cohesive team of cyber security professionals
- Establish and enforce cyber security controls and compliance measures
- Ensure timely identification and mitigation of cyber security risks and threats
- Develop and nurture key relationships within and outside the organization to drive cyber security awareness and outcomes

What we're looking for:

- Proven leader able to engage and empower employees with clear line of sight to business goals
- Strong leader who confidently manages multiple priorities and a high-performance team
- Relationship-builder and collaborator committed to helping others reach their goals
- Strategic thinker and experienced business professional with sound judgment

What you need:

- An undergraduate degree in Computer Science, Cyber Security, or Business Administration
- 10 years of progressive experience across multiple technology disciplines (e.g. development, architecture, data, support, infrastructure) and at least 3 years in a formal or informal leadership role
- A deep understanding of cyber security principles and practices
- A comprehensive knowledge of information technology systems, networks, and technologies
- Certifications in cyber security or cloud-based architecture would be an asset
