

# Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

<b>Company</b>	EPCOR	
<b>Location</b>	Edmonton, Alberta	
<b>Date Posted</b>	From: 2024-06-28	To: 2050-01-01
<b>Job</b>	Type: Full-time	Category: Utilities

### Description

Highlights of the job: We are hiring a full-time, temporary Senior Project Manager, Distribution position working out of Edmonton, AB. This opportunity is open to Internal and External candidates. Current EPCOR Employees please ensure that you are using your "@epcor.com" email address. The Senior Project Manager, Distribution is accountable for overseeing and successfully completing the large complex, multi-year Distribution project for the City of Edmonton Transmission Reinforcement ("CETR") Project. The position will be responsible for ensuring project budgets are accurate and complete, overseeing distribution engineering deliverables, developing and maintaining project schedules, and obtaining required approvals from internal and external stakeholders and governing bodies. The Senior Project Manager, Distribution assigns scopes of work to internal and external resources based on project priorities and deadlines; monitors, controls and reports on project progress and costs on an ongoing basis in accordance with corporate and EDTI requirements, and interacts with crews, sponsors, and engineering to proactively identify and resolve issues and obstacles to ensure the distribution portion of the CETR project is executed in a safe, disciplined and efficient manner. What you'd be responsible for: Developing comprehensive project charters for the scope of the CETR project. Ensuring budget and resource estimates are accurate given available data; assumptions, and constraints are documented, and the scope and estimate methodology are clearly outlined for project reporting and variance analysis. Reporting to project sponsors and key stakeholders on project performance (budget, schedule, and scope) through duration of project or program. Ensuring the delivery of complete, accurate, on-time, and constructible work order packages by setting IFC target dates, arranging design walk-throughs, leading design and construction meetings, and completing thorough reviews of package. Working collaboratively with other Project Managers, Foreman, and Schedulers to compare project completion dates against resource availability. Communicating schedules and scopes of work to internal field and contractor resource groups, ensuring coordination between groups and conducting regular performance reviews. Ensuring adequate qualifications, cost minimization, and proper contractor management practices are exercised, and compliance with EDTI procurement, regulatory, HSE, and legal requirements. Leading project kick-off meetings for all large-scale, high-profile, complex projects. Ensure project requirements, schedules, performance and any site specific safety and environmental requirements or restrictions are proactively managed and clearly communicated to all parties. Monitoring projects by maintaining open communication channels, and conducting site visits to document progress, identify, and manage risks and issues. Conducting routine safety inspections on projects sites documenting any deficiencies and assigning appropriate corrective actions. Meeting performance metrics by facilitating project planning meetings to evaluate work progress; providing guidance on project priority; and creating and maintaining an executable distribution portfolio plan, as well as, monthly project metrics reports. What's required to be successful: Professional Engineering Degree in Civil or Electrical Engineering. Professional Licensee (PL) in Civil or Electrical Engineering with extensive experience in trades, construction or project management will be considered. Project Management Professional (PMP) designation is desired. 5+ years of progressively responsible experience in electrical distribution systems, including direct design or construction experience in Aerial and Underground Distribution systems. Experience in the design and construction of on-site Capital Engineering projects. Experience in project management of complex utility construction projects with increasing responsibility. Experience in planning and executing new initiatives. In-depth knowledge of Aerial and Underground Distribution system construction methods, procedures, work practices and techniques. In-depth knowledge of the Customer Connection Guide and EDTI's Terms and Conditions for Connection and Access Service. High

proficiency with computer software such as Microsoft Office, Ivara, and other work Management tools such as MS Project. Ability to understand and manage complex budgets and schedules relative to this area of responsibility. Ability to work effectively as part of a larger management team within a dynamic environment. Ability to develop, nurture and manage customer relationships. Ability to communicate technical or complex issues in a clear and concise way. Strong analytical and decision-making skills.

Other important facts about this job  
Jurisdiction: PROF

Please note the following information:  
A requirement of working for EPCOR is that you are at least 18 years of age, successfully attained a high school diploma (GED, or equivalent level of secondary education) and legally entitled to work in Canada. (A copy of a valid work permit may be required.)  
If you are considered for the position, clearance on all applicable background checks (which may include criminal, identity, educational, and/or credit) and professional reference checks is required. Some EPCOR positions require an enhanced level of background assessment, which is dictated by law. These positions require advanced criminal record checks that must also be conducted from time to time after commencement of employment.  
A technical/practical assessment may be administered during the selection process and this exercise will be used as a part of the selection criterion.  
To meet the physical demands required of some positions, candidates must be in good physical condition and willing to work in all weather conditions. Clearance on pre-placement medical and drug and alcohol testing may be required.
