

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Experience in cyber defence rewarded

Join our team of experienced cyber security professionals responsible for the security tools, technologies and processes that underpin our security posture.

You'll help shape the vision for the Cyber Security program, apply global threat intelligence to security controls, monitor and respond to security incidents, and participate in proactive activities such as threat hunting, penetration testing and red teaming. You're familiar with related frameworks and practices including NIST CSF, CIS or ISO 27k, SIEM, incident response, cloud security governance, and vulnerability and incident management.

Using your strong interpersonal and communication skills, you'll collaborate with colleagues to recommend and implement security improvements.

What you'll do:

- Assess threats and vulnerabilities and recommend appropriate counter-measures
- Report events that occur and anticipate events that may occur through research from a variety of sources
- Identify, collect and seize evidence
- Gather relevant digital media and logs associated with cyber intrusion
- Create forensically sound duplicates of evidence, ensuring original evidence is not modified
- Recover potentially relevant information from forensic images and volatile data

What we're looking for:

- Innovative problem-solver and critical thinker with a detailed eye
- Broad IT knowledge including networks, firewalls
- Strong communicator who can coach and mentor team members in a fast-paced environment
- Ability to draw insight and pick up on intangibles within complex information

What you'll need:

- Bachelor's degree in computer science, mathematics or engineering and at least six years of cyber security experience (or an equivalent combination of education and experience)
