Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Location: Brampton, ON, CA, L6T 0C1

At Rogers, we connect Canadians to a world of possibilities and the memorable moments that matter most in their lives. Every day we wake up with one purpose in mind. To bring loved ones together from across the globe. To connect people to each other and the world around them. To help an entrepreneur realize her dream. A sports fan celebrate a special moment.

Because we believe connections unite us, possibilities fuels us, and moments define us.

Rogers is seeking a Sr. Developer for Rogers CPE Diagnostic Tools (Customer Premises Equipment). Reporting to the Software Development Manager for the IT Field and Tech Support channels at the Rogers Park Brampton Campus, you will be responsible for the technical and systems analysis, design, development, unit testing, system integration testing, implementation and support of the Rogers CPE Diagnostic Tools.

What you will be doing...

Responsible for the technical and systems analysis, design, development, unit testing, system integration testing, implementation and support of the Rogers CPE Diagnostic Tools

Role includes custodian of the established architecture ensuring that documented standards and procedures are adhered to and assure the smooth interpretability of the applications.

Participate in End To End delivery of highly complex / multiple domains including implementation for projects and maintenance requests

Make technical decisions; articulate and communicate the overall solution as well as running knowledge transfer and code review sessions

Create, Read and/or Update technical and functional documentation (SDS, DDD, and PCR)

Function effectively with the Development, Project and Delivery teams

Manage risk, planning, and mitigation across supported applications and impacted areas.

Participate in developers' code review and provide comments

Help in documentation and providing solution documents

What you have...

4+ Years hands-on experience in the Java, J2EE Technologies. Including (Servlets, JSP, JSF, Struts, EJB, Web Services)

Excellent knowledge of Linux Operating System and Shell scripts

Solid experience of software development using Spring Boot, HTML, CSS, BootStrap, Javascript, JQuery, Angular 2+,Oracle/SQL and etc.
