

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Link's Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Worker Type: Term (Fixed Term)
Language(s) Required: English, French
Term Duration (in months): 25

Expertise managing product delivery in agile environment needed
Lead a multi-disciplinary, agile team responsible for successfully delivering prioritized work. You'll help team leaders clarify next steps and maintain the long-term vision of products. This position is designated bilingual (English and French), and the successful candidate must be able to communicate in both of Canada's official languages.

What you'll do:

- Facilitate the agile delivery process
- Collaborate with product owners on priorities and scheduling
- Manage key control processes to reduce risk
- Ensure critical impacts are resolved quickly and remediation is complete
- Build and maintain a high-performing, engaged and empowered team of employees and consultants
- Mentor the team in development planning, workload management, and setting and achieving performance objectives

What we're looking for:

- Proven leader able to engage and empower employees with clear line of sight to business goals
- Analytical thinker able to keep pace with a rapidly changing industry
- Organized multi-tasker familiar with release processes that maintain product effectiveness and stability
- Relationship-builder and collaborator committed to helping others reach their goals
- Experienced business professional with sound judgment

What you'll need:

- A bachelors degree in computer science, mathematics, engineering or business administration and at least eight years of experience (or an equivalent combination of education and experience)
- In-depth understanding of risk controls; knowledge of agriculture and lending is an asset
- Record of success using agile methodologies for technology lifecycle management
