

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

A Northwestel Cable Splicer installs and maintains all aerial and underground Outside Plant facilities (fibre, copper, and coax) and related hardware. If you are an individual who enjoys working with their hands this Northern opportunity may be the one for you!

Employment Equity

Northwestel values diversity in the workplace and is committed to the goals of Employment Equity. We strive to achieve a skilled workforce that is representative of the population we serve, and as a Northern company, we are committed to the employment and career development of our Indigenous peoples. Candidates must clearly indicate on their application if they are an Indigenous person, a woman, a person with a disability, or a visible minority if they wish to receive hiring preference.

Specific Accountabilities

Install and maintain all aerial and underground Outside Plant facilities (fibre, copper, and coax) and related hardware.

Provide as-built drawing(s) and data for records via computer system upon completion of work.

On-site preparation of cut-over sheets, update maps and records as required.

Provide proper care, operation and safe keeping of all tools, equipment and vehicles as assigned.

Ensure all safety rules, company standards, policies and regulations of the position are followed.

Complete and maintain the flow of reports and correspondence as required.

May be required at times to perform service related duties.

Travel throughout our Operating Territory is required.

Understand and use test gear related to copper, coax, and fibre.

Accurately complete/prepare documentation for all type of outages and threats or a MOP for major cutover and ensure that all the proper parties are involved.

Contact and work with customers to minimize the impact of service interruptions or degradation, per Company protocol.

Accurately locate Northwestel underground plant and complete associated documentation for the customer and for company records.

May be required to do quality inspection on Outside Plant facilities work done by other resources.

May be required to troubleshoot and repair microwave transmission lines and satellite dishes.

Must be able to perform physical duties as required, including working aloft, using equipment provided by Northwestel.

Must be able to work effectively as a team member.

Knowledge and Skills Required

Completed technical diploma in telecommunications or related program at a recognized institute and/or a minimum of one (1) year cable splicing experience with copper, fibre and coax.

Must possess and maintain a valid driver's license, minimum Class 5. With a clean Driver's Abstract, which is conducted periodically by a third party. Obtaining a Class 1 with an air endorsement may be required.

Strong understanding of the theory behind copper, fibre and coax.

Computer literacy (including software Windows XP, MS Office).

Must be flexible and adaptable to continuous change.

Must be physically capable of carrying extension ladders long distances and lifting and moving up to 23 kilograms (51

pounds).

Good interpersonal skills and strong verbal & written communications skills

Need to be able to work as part of a team.
