

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Company Scotiabank

Location Toronto, ON

Date Posted From: 2022-05-17

To: 2050-01-01

Job Type: Full-time

Category: Finance

Description

Requisition ID: 149464

Join a purpose driven winning team, committed to results, in an inclusive and high-performing culture. Purpose The Senior Solutions Developer is responsible for providing the expertise to streamline existing investment information into customized data views, by performing end-to-end system analysis, design, programming, documentation and implementation of in-house and third-party investment solutions used by our investment teams. Working as a partner with Scotiabank technology teams, as well as the fixed income and broader 1832 Asset Management team, the incumbent will be responsible for working within a specific framework of technology and investment management standards, policies and procedures, while collaborating with internal partners to ensure successful execution of mandates. Accountabilities

- Management of a front-office investment data and reporting solution
- Maintain, support, and enhance existing applications using C#, PowerShell, MS SQL and VBA
- Creation of unique reporting solutions specific to end user specifications using (Power BI, Tableau, Excel, etc.)
- Facilitation of and participation in meetings regarding end user requirements and design throughout the development phase of the project
- Develop ETL process using MS SQL Server to ingest, transform, cleanse and load investment data (e.g. prices, positions, analytics, etc.)
- Identify potential issues within ETL pipelines, notify end-users and propose adequate solutions
- Perform logical and physical data modeling to develop highly optimized data infrastructure and assure that data quality, security, and compliance requirements are met
- Automate processes to create specific datasets
- PowerShell scripting for application and environment maintenance
- Develop and maintain database stored procedures, functions and triggers in MS SQL Server
- Daily administration of investment database to ensure that accurate, complete and timely reporting is available (eg 7:00 – 8:00 am) to portfolio managers and the investment teams
- Manage the process of loading and validating data required (e.g. prices, positions, analytics, etc.) in the daily reporting provided to investment teams

- Evaluate existing and new applications and technologies to ensure they align with enterprise strategy and that they meet user requirements
- Optimize database code to enhance performance
- Ensure that all documentation meets application system and technical requirements

Education / Experience The successful candidate must have the following:

- Master's degree in Computer Science, or equivalent, with course work in finance or business administration;
- Minimum 4-7 years related work experience demonstrating progressive responsible work in applications programming and system analysis
- Must have experience in the investment/mutual fund industry, with knowledge of fixed income products and a strong understanding of derivative products
- Proficiency in Powershell, batch scripts, C# .NET, VBA, SSIS and MS SQL Server is required
- Knowledge of source control techniques and use of GIT. Experience with TFS would be an asset
- Knowledgeable with SQL Server database management and administration and SQL Server query development;
- Experience with Bloomberg, Eagle or Charles River is a strong asset.
- Experience with Cloud technology (Azure preferred) is an asset
