

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Requisition ID: 153298

Join a purpose driven winning team, committed to results, in an inclusive and high-performing culture. The Team The Enterprise Risk Management Solutions team is responsible for leading the design and delivery of technology solutions focused on data to support analytics and reporting for Retail Credit Risk. The Role This senior role will lead the delivery of initiatives focused on data, including our journey to cloud. Some of the key accountabilities include: Responsible for delivering data engineering projects that advance the Retail Credit Risk data roadmap Participate in the solution, design, plan, coordination and management of initiatives with varying scope and complexity. Assess and analyze business strategy & requirements, the current technical environment and technology options to evaluate solution alternatives that meet business needs and bank strategy. Collaborate with multiple teams on solution design and delivery Participate in design discussions with stakeholders focused on scalability, design and implementation best practices Present solution design in a way that establishes trust, persuades stakeholders and achieves understanding and consensus at all levels. Maintain a sharp focus on system reliability and ensure overall solution architecture can gracefully handle upstream and downstream system failures. Be curious, constantly learning about new trends in IT enterprise technologies especially in the area of CI/CD and DevOps and share the knowledge with end users and team members What You Will Bring to Succeed Strong communication skillset to align various business stakeholders into a solution. Firm understanding of the Bank's risk appetite and risk culture and how these are considered in day-to-day activities and decisions Experience working with ELT/ETL in a Big Data environment, both on-premise and cloud (e.g. Hadoop, HDFS, MinIO, Spark, Python, Google Cloud Platform, Microsoft Azure, AWS) Familiarity with Retail Credit Risk and associated regulatory and financial reporting requirements Strong data analytic mindset for the purpose of data solutioning, testing/validation and gap analysis.
