

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Requisition ID: 159645

Join a purpose driven winning team, committed to results, in an inclusive and high-performing culture. The Team Enterprise Risk Management Solutions (ERMS) Architecture and Engineering Team is in charge of architecture roadmap, architecture design, guidelines, principles, new technology proof of concept, knowledge sharing to support business banking credit risk, retail banking credit risk, insurance, and capital domains. The Role The role of the Senior Solutions Architect - Data Technology within the Enterprise Risk Management Solutions (ERMS) team. As a senior platform architect, you would have to provide platform design to support applications by leveraging all the EA approved tools – DataStage, FastTrack, IGC/Colibra, Docker, Kubernetes, GCP, CDP, Python, Spark, MinIO, Trino and CiaD tools. In addition to platform design, mentoring, training, coming up with standard/guidelines and supporting project teams in ERMS are also required. Some of the key accountabilities include:• Works closely with Delivery and Engineering teams, Product Owners and enterprise platform teams to architect, design and develop high quality platform architecture supporting the ERMS applications • Preparing and presenting ARB deck in ARB review meetings and seek of ARB approval for the initiatives • Preparing Application/Platform Roadmaps for Interim State and Target State • Skilled ETL knowledge with a high degree of proficiency in working with both structured and unstructured data, including collating disparate data sets from many sources • Create and support Test Automation and Continuous Integration & Deployment (CI/CD) methodology/tooling. Troubleshooting and problem solving across platform and application domains. • Provide mentorship, peer review, and code review on project delivery • Participate in design discussions focused on platform design and implement best practices • End-to-end software architecture, design and development of complex systems • Understands testing at every stage of development. This includes unit, mutation, use-case, performance, availability (failure injection) and consistency testing • Doing PoC on advanced big data/cloud technologiesWhat You Will Bring to Succeed

• Strong Understanding of CI/CD (Jenkins, Git, Bitbucket, other).
• Strong knowledge of Cloud technologies (GCP preferred)
• Strong understanding of container and micro-services technologies (Docker, Kubernetes, APIM); domain expertise in data platform features and capabilities
• Proven experience working with big data technologies (e.g. Spark, Airflow, MinIO, Rancher, DBT, Trino, Presto, JupyterHub)
• Proven experience working with relational databases (DB2, MySQL, PostgreSQL).
• Experience working with traditional data warehousing / ETL tools (Talend, Informatica, DataStage, other).
• Experience in Agile/Product/Architecture.

• Ability to solve ambiguous and typically novel problems that require the effort of several engineers and organizational alignment
• Ability to provide technical leadership of small technical teams in delivering production solution
• TOGAF certification is an asset
