Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

nine day work cycle which normally provides every other Monday off

Manitoba Hydro is a leader among energy companies in North America, recognized for providing highly reliable service and exceptional customer satisfaction. Join our team of Manitoba's best as we continue to build a company that supports innovation, commitment and customer service.

We are seeking a dynamic IT professional to work in Winnipeg, Manitoba. You will report to the Supervisor of Data Centre Services and will be responsible for defining and supporting the network architecture for the Information Technology Services Division.

Responsibilities:

-Understand, advocate and augment the principles of architecture and technologies as it relates to network infrastructure.

-Lead the architectural design and technical implementation of corporate network segmentation.

-Provide level III support to other members of the Network Team during problem resolution.

-Participate in and lead IT projects related to network infrastructure.

-Establish a network technology roadmap that addresses short and long term goals.

-Collaborate with other IT architects to design, plan, evaluate and recommend solutions that are compliant with enterprise standards and are compliant with business strategies.

-Communicate network architecture capabilities to technical and business stakeholders.

Keep abreast of industry trends and technologies and inform management and staff accordingly.

-Take a lead role in organizing and coordinating large system changes and technical upgrades.

-Develop strong working relationships with industry contacts.

-Ensure that initiatives and project initiated within the network management area align with department, division and corporate strategic goals.

-Review, research and implement best practice in the industry related to network management.

Qualifications:

-Four year degree in Computer Science or Computer Engineering from a university of recognized standing plus five years of experience directly related to network architecture

OR

-Two year diploma in Computer Technology from an institute of recognized standing plus seven years of experience directly related to network architecture.

-Demonstrated understanding of network segmentation within a brownfield network environment.

-Demonstrated understanding on network security concepts and network security control points.

-Comprehensive and current knowledge of network hardware/software.
-Demonstrated ability to analyze, plan, control and make decisions related to the selection and implementation of network infrastructure.
-Strong teamwork skills with the desire and ability to mentor junior staff.
-Experience working with large IT projects where multiple stakeholders are involved.
-Experience designing and implementing technology solutions in a brownfield network environment.
-Proven ability to transform business requirement into IT solutions that align with existing strategies and goals.
