

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Ministry of Water, Land, and Resource Stewardship

Multiple Locations

Ecosystems Biologist

Hybrid

The Provincial Caribou Recovery Program sits within the Land Use Policy, Planning and Ecosystems Division within the new Ministry of Water, Land and Resource Stewardship and provides provincial coordination, strategic direction, funding, and general oversight with the aim to recover caribou in B.C.

As an Ecosystems Biologist, you will be expected to provide professional and technical expertise to support the recovery and management of caribou and caribou habitat. Working closely with senior biologists and planners within the Northeast Region and across the provincial Program, key activities will include planning, implementation, and monitoring of caribou recovery related initiatives such as, but not limited to, caribou habitat assessment, habitat restoration, establishment of protections, supporting the implementation of intergovernmental agreements such as the Caribou Partnership Agreement for Central Group of Southern Mountain Caribou and plans such as the proposed Boreal Caribou Protection and Recovery Plan. You may also provide subject matter expertise on herd planning initiatives in the broader context of land use planning, drafting of monitoring and technical reports, leading or supporting projects with both internal and external collaborators, and data entry and records management. While this position is caribou focused, you will also be expected to understand interactions with a diversity of wildlife species and habitats and may be asked to support projects pertaining to other species of management importance. This position has both office and field-based components.

Qualifications for this role include:

- Minimum of a Bachelor's Degree in biological sciences or related field.
- Three years of related experience (or an acceptable combination of education and experience).
- Registered (or eligible) as a Registered Professional Biologist (RP Bio) in B.C. with the College of Applied Biology within six months of employment.

Related experience includes a combination of the following:

- Experience conducting field-based biological sampling, analysis, and reporting.
- Experience in conducting environmental monitoring and assessments.
- Experience providing advice within a regulatory regime.
