

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Job

Closing Date (MM/DD/YYYY): 05/14/2021

Worker Type: Permanent Language(s) Required: English Architectural expertise welcomed

This role is accountable for the development of FCCa€™s technical solutions including the design, development, testing and deployment of code, and interpretation of business requirements.

The Senior Developer is responsible for delivering a high level of informal leadership while developing the most complex and strategic components of a solution.

What you'II do:

- Participate in a solution's architectural direction and be responsible for solution design and implementation
- Analyze and develop new code including automation, integration and unit tests
- Implement code fixes and support user testing
- Participate in and/or lead application design sessions
- Participate and/or leads the design and development of models and analytics
- Actively contribute to code reviews providing constructive feedback to team members
- Participate in, or lead group design or coding sessions
- Ensure technical solutions and system integrations are developed and maintained in the most efficient and effective manner

What we're looking for:

- Expert-level proficiency with one or more technology stacks or languages
- Ability to deliver very complex solutions
- Communicates complex technical concepts to technical and non-technical personnel
- Experienced coach and mentor who can help improve team processes
- Proven knowledge of common design patterns and when to apply them
- Innovative problem-solver and critical thinker with a customer focus
- Advocate of smart, clean and maintainable code
- Optimizes design to enable business value creation through analytics
- Passion for technology and software development

What you'II need:

- Bachelor's degree in computer science or engineering, or mathematics/statistics and at least 10 years of related experience (or an equivalent combination of education and experience)
