

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Job Summary

The Information Technology Solutions and Services (ITSS) Branch is the centralized authority for all matters pertaining to the automation and delivery of corporate Information Technology (IT) services. We design and develop innovative information technology applications and systems and provide ongoing support of core information systems and services to enhance CSIS' ability to fulfill its mandate. Depending on the position, job functions may include one or more of the following responsibilities:

- Support, design, develop, enhance, and implement computer application systems and programs.
- Evaluate the performance of existing computer systems, plan and direct upgrades and improvements, troubleshoot problems / test and resolve issues.
- Provide recommendations to enhance IT systems and services.
- Support, administer, configure, and install software and hardware products and systems.
- Implement new products or upgrades in a network operating system environment by determining the feasibility, the cost / benefit, assessing the impact to all clients.
- Liaise with clients (including senior management and executive), partners and external vendors to resolve issues and recommend next steps.
- Develop, evaluate and test new technologies.
- Responsible for providing 24/7 first tier management and support.
- Research, analyze and recommend current trends, standards, practices and/or products, such as ITIL methodologies, in an IT environment.
- Analyze requirements and/or provide advice and guidance on IT matters to various audiences such as business partners and management.
- Work in a client service environment and deal directly with employees of different levels

- Provide access to all IT network services.
- Responsible for authorized changes/releases to the IT infrastructure.
- Responsible for Configuration Management.

Education

Undergraduate degree or Technologist diploma or a Professional technologist equivalency designation within one of the following fields:

- Computer science
- Network Security
- Telecommunications
- Electronics
- Electrical
- Engineering
- Similar engineering disciplines
- Business Relationship Management Program

The educational program must be from an accredited learning institution recognized in Canada. If you completed a program outside of Canada, you will be required to obtain proof of a Canadian equivalency at your expense through a recognized credential assessment service. Note: Any higher level of education could be recognized as experience.

Experience

Undergraduate degree and one (1) year of relevant experience

- Underfill - no experience requirement.

Security Requirements

Candidates must be eligible to receive an Enhanced Top Secret security clearance. The process involves a security interview, a polygraph, and a background investigation that includes credit and financial verifications. The use of illegal drugs is a criminal offense. Drug use is an important factor considered in your reliability and suitability assessment during the selection process. Therefore it is important not to use any illegal drugs from the time you submit your application.

Others

We thank all applicants for their interest in CSIS. However, only those who are selected for further consideration will be contacted.
