Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

<p>Come play a key role in building the future of Sports &amp; Media! Everyone wants to be part of a transformational team – and that’s exactly what we’re building at Rogers Sports &amp; Media. A team that innovates and a team that wins.</p><p>At Rogers Sports &amp; Media we are committed to creating and growing teams that are digital-first, fast-moving and bold-thinking and are focused on delivering impact with everything they do. Our impressive collection of assets includes media properties, sports teams, sports events &amp; production, venues, e-commerce platforms and a close connection with our Connected Home and Wireless team. Collectively, we touch 30 million of Canadians every month!</p><p>Not only is our business strong, but so is our culture. We genuinely care about each other and working in an environment that allows each of us to bring our best authentic selves to work. That starts with our firm commitment to a diverse, inclusive and safe workplace. We’re also dedicated to giving back by using our media megaphone to help Canadians who need it most. Our team is All IN on diversity and inclusion – find out more at www.allinforequity.ca.</p><p>As we grow our team, the well-being of our team members remains our top priority. To ensure the health and safety of our team members, including those in the recruitment process, our team members are temporarily working from home.</p><p>Are you up for the challenge and the fun If so, consider the following opportunity!</p><p>We&rsquo;re looking for a Senior DevOps Engineer to join our Technology team at Rogers Sports &amp; Media. The Media landscape is changing. Canadians are increasingly tuning in to streaming as their main source of TV consumption but also want more engagement and more personalization. Rogers Sports &amp; Media understands this need to continuously evolve and transform to delight our fans.</p><p>The role of Sr DevOps Engineer is that of a change agent within Rogers Sports and Media. The department goals can be summed up as follows: Innovation, Simplification, Integration, Collaboration, Acceleration and Automation. With these in mind, we are looking to revolutionize both how content is created and consumed.&nbsp;</p><p>What you will do&hellip;</p>
Lead design sessions with Manager to determine and identify technical requirements with the stakeholders and product owners.
Collaborate with Infrastructure team to optimize VMs, containers and deployments.
Build and document a complete CI/CD pipelines around Azure DevOps that will support both the DevOps and Innovation Lab departments.
Implement the designs to achieve continuous integration, build automation and continuous delivery for our application and infrastructure code. Work with Enterprise IT team to implement already available service automation, quality, security and testing tools within our own CI/CD pipeline.
Work with our Enterprise IT to build best practice Release Management. Build and release procedures and workflows with NOC team. Implement and maintain our configuration management for our cloud and container resources. Ensure adherence to version control and security policies.
Develop and administer different test suites covering unit, integration, and functional testing
Support and triage issues with the CI/CD pipelines in coordination with both the development and operations team members in development, staging and, if necessary, production environments
Interact with project management to plan projects schedules and technical direction. Work with both internal and external development groups.
Take initiative to identify present and future obstacles, issues, and opportunities. Take action&nbsp;to address such obstacles.
<p>What you will bring&hellip;</p>
Experience in DevOps engineering including design and development of CI/CD experience in an agile delivery structure.
Experience coding using general purpose programming language (Java, Python, C# and Javascript)
Basic to intermediate understanding and practice of Angular, React and Vue.
Must have experience with Azure Devops. Microsoft Certified DevOps Engineer Expert would be an asset (AZ-400).
Excellent scripting capabilities including Python, Bash, Groovy and Ruby.
Experience working with both Microsoft Azure and AWS Cloud services. Embrace and advocate change in a in a complex hybrid environment (IaaS/PaaS).
Good knowledge with collaboration tools such as: Microsoft Teams Suite, Azure Boards, JIRA and Confluence.
Experience in Splunk, Elastic or Zabbix would be an asset.
Experience with Linux/Unix administration and concepts.
Experience in Web Services protocols such as REST, SOAP and API design for extensibility and portability as well as XML/JSON data formats.
Strong technical aptitude, communication skills and willingness to learn a new application/domain are a must.
Experience with Scrum/Agile development methodologies. Certified Scrum Developer would be an asset.
Previous background in either broadcast or streaming would be an asset.
Video streaming protocols like knowledge of UDP, RTMP, SRT, Zixi, WebRTC, HLS, DASH, Microsoft Smooth Streaming would be an asset.
Understanding of video compression standards like MPEG2, MPEG4 and H264 would be an asset
Oral and Written Communications: Ability to express oneself and communicate with others verbally ‐ it includes tone, style and structure and the ability to produce a variety of technical and business documents that demonstrate command of language, organization of thought and orderliness of presentation.
<p>Here&rsquo;s what you can expect in return:</p>
A competitive salary and benefits that include access to our Employee Share Accumulation Program, Retirement Benefits and a variety of other perks including 50% off Rogers services and Blue Jays tickets
A manager who deeply cares about your development and long-term career at Rogers
A team that trusts and wants to win together
Smart and accomplished colleagues who are focused on both the &ldquo;what&rdquo; and the &ldquo;how&rdquo;&nbsp;
Flexibility to work from home even after the

pandemic ends&nbsp;
Your choice of hardware and software (iPhone or Android/Mac or PC etc.)&nbsp;
As we grow our team, the well-being of our team members remains our top priority. To ensure the health and safety of our team members, including those in the recruitment process, our team members are working from home, and are equipped to do so safely and efficiently
Not from the city No problem! Rogers invites candidates to apply no matter where you are located &nbsp;as you will be working remotely.
&nbsp;
<div> </div><div>What makes us different makes us stronger. Rogers has a strong commitment to diversity and inclusion. Everyone who applies for a job will be considered. We recognize the business value in creating a workplace where each team member has the tools to reach their full potential. At Rogers, we value the insights and innovation that diverse teams bring to work. We work with our candidates with disabilities throughout the recruitment process to ensure that they have what they need to be at their best. Please reach out to our recruiters and hiring managers to begin a conversation about how we can ensure that you deliver your best work. You matter to us!
