Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Req Id: 234382 At Bell, we do more than build world-class networks, develop innovative services and create original multiplatform media content – we’re revolutionizing how Canadians communicate. If you’re ready to bring game-changing ideas to life and join a community that values bold ideas, professional growth and employee wellness, we want you on the Bell team.

Bell is making unmatched investments in our world-leading broadband fibre and wireless networks because we know they’re the backbone of the products and services our customers love. If you’re excited about transforming the way people connect, our Network team is the right place for you.

 The successful candidate will mainly be responsible for integrating Security Solutions engagements in dedicated environments to support Government of Canada contracts. Drawing on both technical and business integration acumen, there is the opportunity to interact with and manage relations between both Customers and Bell Canada staff. This role requires the hands-on Design and Deployment of projects with project teams of varying sizes. Job Duties/ Accountabilities:

- Complex testing, deployment, integration, and remediation of Security solutions.
- Defining customer requirements with a focus on solutions at an Enterprise level.
- Developing detailed architecture inputs, requirements analysis, functional and technical specifications, testing documents, and build books, in support of complex integration activities.
- Working directly with Customer Technical Leads, Bell Technical Leads, and supporting team members, in driving successful Technical Security Solution delivery outcomes, to Project timelines and expectations.
- Providing technical support services to develop and maintain integrated Security solutions.
- Participating in the approval of vendor choices and establishing product / vendor selection criteria.
- Determining system architecture specifications and working parameters for hardware/software compatibility.
- Configuring and validating secure systems, testing security products and systems to identify security weaknesses.
- Contributing to continuous growth of the Security Solutions practice through mentorship, identification of new opportunities and development of Security solutions.
- Take the Lead on ensuring full Complex Security solution integration, across multiple Products and Subject Matter Expertise. Ownership of outcomes and ability to learn quickly and deploy on time are important in the role. Critical Qualifications/Competencies:
- 7+ years in IT with a minimum of 5+ years of demonstrated experience in providing hands-on technical integration expertise on AVAS, SIEM, and Firewall / UTM Solutions within large Corporate environments.
- Experience may include, but not limited to:
- Providing guidance on Enterprise Security solutions
- Defining Enterprise Security solution requirements
- Installing and configuring Security solutions for Enterprise solutions – hands-on installation and remediation is important to the role.
- Experience with DLP, IDS / IPS, VA scanning, Secure Proxy, Load Balancing experience/skills in both architecture and deployment/build, at 3+ years, is considered an asset to the role
- Excellent writing, presentation and communication skills in English.
- Able to communicate technical points to others at the technical, user and management levels.

- Superb customer relations and the ability to interact with customers at all levels.
- Strong IT networking skills.
- Strong Data Centre, Cloud Integration, Storage skills, are considered an asset to the role.
- Ability to gain management support and work effectively at all levels across the organization and across department.
- Team oriented, with extensive experience in working in complex technical projects.
- Autonomous and ability to accept responsibility with minimal supervision.
- Must have current Secret Security Clearance issued by a Government of Canada
 Preferred Qualifications/Competencies:
- Experience with Fortinet, Cisco ASA, F5 WAF, Palo Alto Firewalls and Juniper Firewalls
- Experience in participating in the recommendation of security best practices for the design and configuration of Security Solutions.
- Experience in participating in the definition and implementation a Security Solutions roadmap.
- Experience in automation with strong scripting skills (Python, Ansible, PowerShell, etc)
- Bachelor or specialized college degree in Computer Science, System Engineering or another related IT program, is an asset.
- Professional designation such as CISSP, CISM, etc. is an asset.
- Bilingual (English and French) in both spoken and written capability is an asset.
 #LI-SAH1 Bilingualism is an asset (English and French); adequate knowledge of French is required for positions in Quebec. Additional Information:Position Type: Management
Job Status: Regular - Full Time
Job Location: Canada : Ontario : Ottawa
