

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Job	Type: Full-time	Category: Telecommunications

Description

At Rogers, we connect Canadians to a world of possibilities and the memorable moments that matter most in their lives. Every day we wake up with one purpose in mind. To bring loved ones together from across the globe. To connect people to each other and the world around them. To help an entrepreneur realize their dream. A sports fan celebrate a special moment. Because we believe connections unite us, possibilities fuel us, and moments define us.

As we grow our team, the well-being of our team members remains our top priority. To ensure the health and safety of our team members, including those in the recruitment process, our team members are temporarily working from home.

Who we are: The Continuous Service Validation & Reliability team manages new software release testing of all Connected Home Services (Ignite TV, Ignite Home Phone, Internet, and Smart Home Monitoring) for Rogers Communications. The team is responsible for ensuring high quality product updates are propagated to Rogers customers by applying industry leading automated testing practices, as well as daily validation of key product features and functionalities. In addition this team is part of the Rogers Tech Hub; Tech Hub is more than a new organization. Tech Hub is a re-imagined way of delivering next-gen technology solutions with speed that delight our customers and inspire our teams.

- It brings industry-leading development and delivery practices in-house.
- It modernizes our foundational architecture.
- It unifies organizations into a common mission. And it revolutionizes our culture.

The Opportunity: Tech Hub is currently seeking a Site Reliability Engineer (SRE) to build and run large-scale, distributed, fault-tolerant systems. SRE ensures that Tech Hub's services both our internally critical and our externally-visible systems have reliability, uptime appropriate to users' needs. Additionally, SREs will keep an eye on our systems capacity and performance and demonstrate a mindset of driving continuous improvement. Much of our software development focuses on optimizing existing systems, building infrastructure and eliminating work through automation.

On the CSV&R team within Tech Hub, you'll have the opportunity to manage the complex challenges of scale, while applying your expertise in coding, algorithms, complexity analysis and large-scale system design. Within this role you will be encouraged to showcase your ability to multi-task, experiment and innovate, take risks in a blame-free environment, and solve complex problems by collaborating with others within our diverse team who come from a wide variety of backgrounds.

Responsibilities:

- Engage in and improve the entire lifecycle of services (inception, design, deployment, operation, and continuous improvement).
- Support services before they go live through defining and instrumenting SLOs (Service Level Objectives) and SLIs (Service Level Indicators) through system design, software development of micro-services and frameworks, and capacity planning.
- Maintain services once they are live by measuring and monitoring overall system health via SLOs & SLIs and demonstrate leadership throughout the incident management process, including blameless post mortems.
- Scale systems sustainably through mechanisms like automation and evolve systems by pushing for changes that improve reliability and performance to ensure customer expectations are being
