

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Link's Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Our Digital & Technology team wakes up every day with one goal in mind; to connect Canadians to the people and things that matter most. Collectively, we're proud to support 30 million Canadians each month. We manage a robust portfolio that champions the leading edge of technology and media. We drive projects that expand connectivity to underserved communities from coast-to-coast-to-coast; build and enhance our fixed broadband network to provide high-speed Internet, TV and Smart Home Monitoring; and support our world class wireless network, offering our customers Canada's largest and most reliable 5G network. As the Digital & Technology team, we are building our tomorrow, today. Come play a key role in building the future of innovation in Canada. Let's make your possible. Do you enjoy working on high-scale, complex, and high visibility projects and programs? If yes, consider the following opportunity. Do you enjoy working on high-scale, complex, and high visibility projects and programs? If yes, consider the following opportunity. Rogers is seeking a Senior Manager Classified Programs individual to join Information & Cyber Security Unit and accountable for architecture, design, engineering and operations of critical classified systems related to telecommunication systems. Reporting to the Director Cyber Security and Classified Programs at the Rogers Brampton Campus, the Senior Manager Classified Programs will be leading a team and will work to coach and develop the team, providing managerial support and guidance on best practices for optimum delivery. The Senior Manager will manage projects that contribute to the ongoing improvement and quality of the systems, striving to meet, anticipate and exceed stakeholder expectations. The domain focus for the Senior Manager will be to lead and manage the technical architecture, design, engineering, and operations of classified systems. This person will be working with network engineering teams, cyber security teams, regulatory teams, telecom standards teams, external agencies, and vendors. What you will be doing... Lead and manage a team, and conduct coaching, development planning, inspiring team to execute on the vision. Manage the operations of classified systems, including activities such as planning for upgrades, maintaining platform health, coordinate patching, recommend system improvements. Lead the strategy and architecture design of classified systems and consider relevant standards and impacts to the systems. Assist in driving projects related to enhancements and new system development as required by stakeholders, both internal and external. Build and maintain key relationships with industry experts, technology peers and stakeholders to demonstrate the value and effectiveness of Rogers security. Encourage a culture that supports the development of innovative and effective solutions. What you will bring... Required 10+ years of relevant network engineering or operations experience in telecom environment. Undergraduate or graduate degree in any engineering domain. Strong fundamental understanding of 3GPP (3G/4G/5G), DOCSIS, GPON, IP, ESTI, ATIS standards, Virtualization and other telecommunication technologies. Advanced knowledge of technology standards (e.g., Infrastructure, Network, Architecture). Familiarity with cybersecurity frameworks & regulatory controls including ISO, NIST. Well-developed leadership, management, and strategic-thinking skills, with the ability to excite and lead others. Can direct and manage multiple priorities in high pressure situations. Effective communication to varying audiences, including senior executives, technology peers, and government officials. Able to analyze complex security issues and provide pragmatic options and recommendations. Strong business and technical acumen. Ability to work with cross-functional teams and achieve goals and meet deadlines in a fast-paced environment. Preferred CISSP, PMP certification. Schedule: Full time. Shift: Day. Length of Contract: Not Applicable (Regular Position). Work Location: 8200 Dixie Road (101), Brampton, ON. Travel Requirements: Up to 10%. Posting Category/Function: Technology & Information Technology. Requisition ID: 278869. At Rogers Digital, our team doesn't shy away from big ideas; we bring them to life.
