

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Description

Job Posting Title IRC10367

Job Title Senior Specialist, Environment

Company Overview

Capital Power (TSX: CPX) is dedicated to delivering Responsible Energy for Tomorrow. Headquartered in Edmonton, Alberta, weâ€™re a growth-oriented North American power producer that creates dependable, cost-effective and innovative electricity solutions to power a sustainable future.

As a group of experts and innovators in our field, weâ€™re taking a leadership role in developing renewables, improving thermal generation efficiency and supporting the development of carbon capture, utilization and storage (CCUS) solutions to support a low-carbon energy system.

Join us in powering a clean energy future!

Brief Posting Description

One Permanent, Full-Time Position.

Capital Power Corporation is currently seeking an innovative and results-oriented individual to join our Environment team.

Reporting to the Senior Consultant, Environment the Senior Specialist, Environment is accountable for the delivery of effective environmental support with a focus on Business Development opportunities. The Senior Specialist, Environment operates within the context and prescribed limits established by the Senior Consultant, Environment.

Detailed Description

Key accountabilities include:

- Provide strategic planning and direction for environmental permitting and approvals. Lead the development and submission of environmental applications for new and existing power generation facilities in Canada and the United States.
- Lead environmental due-diligence activities for acquisitions and development opportunities in Canada and the United States. Develops and implements integration plans for new acquisitions.
- Provide environmental support and direction for the construction of renewable and other power generation projects. This includes the preparation of accurate and timely technical reports and

regulatory applications, identification and management of project risks, and identification and management of budget requirements.

- Support the development and continual improvement of Capital Power's environmental management systems.

- Ensure optimal deliverables through effective cross-functional accountability and authority practices (when relevant) within Senior Specialist's context and prescribed limits.

- Monitor organizational adherence to environmental policies, standards and processes.

- Require CP employees to stop work if environmental compliance is at risk.

- Manage outsourced Environmental services.

- Provide input and support to environmental compliance systems and programs.

- Proactively develop and manage collaborative relationships with external regulators and stakeholders.

- Prepare strategic communications and work plans to resolve complex environmental or regulatory issues.

- Provides input into post-project reviews.

- Promote and nurture a high-performance, high-discipline, safe, accountable, focused, innovative and achievement-oriented organization that is easy to do business with.

- Ensure the delivery of optimal results against appropriate performance metrics. Metrics include proactively meeting customer expectations, on-time delivery of deliverables, budget management and delivery of technical expertise.

- Monitor organizational adherence to environmental policies, standards and processes.

- Manage environmental risks, issues and incidents to mitigate impacts and identify corrective actions.

- Effectively engage applicable functional groups in the company in environmental matters related to their area of responsibility.

- Other responsibilities as assigned to support ongoing environmental compliance and management.

Additional Details

In order to be considered for this role you must be legally eligible to work in Canada.

As this is a safety sensitive position, clearance of a pre-employment drug & alcohol test is required.

We're committed to providing a meaningful work experience that challenges you to be your best at every stage of your career with us. You will be empowered to take on opportunities you never thought you would. We offer a highly flexible benefits and wellness program, comprehensive onboarding and training, and various development opportunities to support your success and personal growth.

We're passionate about our employees and proud to foster a culture that values diversity; realizing an inclusive and diverse team is paramount to help grow our company and power the future. We're proud to foster an environment where employees go home safe every day feeling physically, emotionally and financially supported.

Experience

- Strong foundation in the environmental sciences.

- Thorough understanding of environmental regulatory and permitting processes in Canada and the United States. Direct experience with renewable and thermal power generation projects is desirable.

- 7 to 10 years relevant experience with exposure to industrial facilities and developments.
- Strong understanding and demonstrated experience developing and managing environmental management systems.

Education Requirements

- Post-secondary education in Environment Sciences, Business, Engineering or other relevant discipline

Essential Skills

- Exceptional written and verbal communication skills. Demonstrated ability to prepare concise technical summaries and reports.
- Process management: the ability to develop, implement and manage processes and procedures with respect to the gathering, analysis and dissemination of key environmental metrics and data.
- General understanding of the power generation business and associated environmental risks.
- Strong project management and presentation skills.
