

# Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

### Description

The Adaptive Systems Inc. is a research and product development company located in Milton, Ontario. We work on cutting edge software solutions for health informatics market. We are seeking an experienced Software Developer with strong hands-on software design and development skills to work on challenging projects. This position provides the opportunity to join a multidisciplinary team of engineers and developers to work on leading edge healthcare technologies in a collaborative environment. Tasks include customer interaction, requirements collection and system analysis, solution architecture and design, software development and testing, systems integration, release and building planning for software solutions.

### RESPONSIBILITIES

- Design and development of secure and cross-platform health informatics software solutions
- Design, build and maintain APIs and database driven web-applications
- Take ownership of full solution development including web GUI, database design and backend
- Design, code and test functional and user-friendly web-applications
- Collaborate with other developers, clinical and sales staff to gather user requirements and contribute to system specifications documentation
- Define, plan and coordinate the software development work breakdown and tasks for EMR and PACS integration projects
- Create and maintain design history files for the development projects
- Technical support on system and software issues
- Research on new technologies and tools to be used in future products

### Experience

Demonstrated 1-3 years industry experience of developing web and software applications targeted for healthcare informatics.

### Education Requirements

Minimum of bachelor's degree (Computer Sciences, Math or Engineering) or equivalent

combination of education and experience

### **Essential Skills**

• Hands-on experience with Web Applications and technologies such as HTML5, CSS3, jQuery, Typescript, JavaScript, PHP, AngularJS, ASP.NET, Web API, HTML5, CSS3, WCF, LINQ, and NodeJS

• Knowledge and experience with Object Oriented programming and Web Services (REST, SOAP)

• Hands on design and development experience using C# and .NET languages

• Experience with Healthcare informatics including HL7, imaging (PACS, DICOM) and EMR integration

• Experience using software design patterns tools like MVC

• Experience with database design and integration (SQL)

• Experience with source control tools like GitHub

### **Other**

Terms of employment: Permanent, Full -time

Job Location: 555 Industrial Drive, Suite 109, Milton, ON, L9T 5E1
