

Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Link's Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Company	McMaster University	
Location	Hamilton, ON	
Date Posted	From: 2020-07-17	To: 2050-01-01
Job	Type: Full-time	Category: Education

Description

The Department of Health Research Methods, Evidence and Impact, Faculty of Health Sciences, at McMaster University invites applicants for a three-year (renewable) faculty position at the Assistant Professor rank in the Special category. The successful candidate will hold a joint appointment in the Department of Medicine, Division of General Internal Medicine. This position is predominantly a research oriented position and we are looking for an individual with an established track record in clinical infectious diseases and developing and applying new methods to improve efficiency and trustworthiness of clinical practice guidelines. The successful applicant will be involved in a combination of clinical, research and educational activities and will work closely with the established CLARITY research group in the Department of Health Research Methods, Evidence and Impact, Faculty of Health Sciences at McMaster University. Clinical activities will include in-patient clinics, out-patient clinics and teaching clinics. Research activities will include participation on grants and publications in the area of infectious diseases. Educational activities will include teaching and supervision of students in the Department of Health Research Methods, Evidence and Impact graduate programs and medical students and residents in the McMaster undergraduate and postgraduate medical programs. Applicants must have a MD and specialty training in Internal Medicine. Applicants must have obtained a PhD in Health Research Methodology or a related discipline and must have proven experience in clinical research. Applicants should be certified (or eligible for certification) by the Royal College of Physicians and Surgeons of Canada and must be licensed to practice (or eligible for licensure) in the Province of Ontario.
