Indigenous.Link

Canada's fastest growing Indigenous career portal, Careers.Indigenous.Link is pleased to introduce a new approach to job searching for Indigenous Job Seekers of Canada. Careers.Indigenous.Link brings simplicity, value, and functionality to the world of Canadian online job boards.

Through our partnership with Indigenous.Links Diversity Recruitment Program, we post jobs for Canada's largest corporations and government departments. With our vertical job search engine technology, Indigenous Job Seekers can search thousands of Indigenous-specific jobs in just about every industry, city, province and postal code.

Careers.Indigenous.Link offers the hottest job listings from some of the nation's top employers, and we will continue to add services and enhance functionality ensuring a more effective job search. For example, during a search, job seekers have the ability to roll over any job listing and read a brief description of the position to determine if the job is exactly what they're searching for. This practical feature allows job seekers to only research jobs relevant to their search. By including elements like this, Careers.Indigenous.Link can help reduce the time it takes to find and apply for the best, available jobs.

The team behind Indigenous.Link is dedicated to connecting Indigenous Peoples of Canada with great jobs along with the most time and cost-effective, career-advancing resources. It is our mission to develop and maintain a website where people can go to work!

Data-driven, analytical thinker wanted
Uncover and highlight new opportunities to improve customer experience, and drive key insights from FCC's Customer Experience Measurement program. You'll work with business leaders and team members to design strategies and create data-driven solutions.
What you'll do:
- Unlock insights from complex and diverse groupings of internal and external data or developed models to tell a story
- Use advanced analytics techniques to enable enlightened decision-making
- Choose appropriate ways to tell the story through words, visualization, and interpretation
What we're looking for:
- Analytical thinker who can design and develop strategies that give users the information they need to make informed decisions
- Creative thinker with research, analytical, and problem solving skills
- Confident communicator who can translate knowledge for others
- Relationship-builder comfortable making recommendations for improvement
What you'll need:
- A bachelor's degree in agriculture, finance, business, economics, mathematics, statistics or computer science and at least four years of experience (or an equivalent combination of education and experience)
- In-depth understanding of statistics and mathematics combined with business domain knowledge
- Highly proficient in visualization and analytics tools including but not limited to SAS, MS Power BI, AWS environment and tools, R, Python

- A passion for analysis, insights and storytelling
